## **Acknowledgments**

I am greatly indebted to the many individuals who helped make the 2003 Statewide Client Satisfaction Survey and the preparation of this report such a rewarding experience. First of all, I thank the directors of the treatment agencies that participated in the survey. Many of them had participated in the two previous surveys, and I hope they will continue to do so in the future. Secondly, I thank Kenneth D. Stark, director of the Washington State Division of Alcohol and Substance Abuse (DASA), who had conceptualized this survey from the beginning and has continued to support it as a tool for collecting feedback information from treatment clients. Thirdly, I thank the following staff of the DASA Research and Evaluation Section: Toni Krupski, for her guidance during the administration of the survey and for critically reviewing the draft of this report; Kevin (Buzz) Campbell, for producing the county-level and provider-level reports; and Bev Smith, for taking care of the mailing and a million other things related to the survey and the printing of this report.

DASA's Regional Administrators (RAs) and the County Alcohol and Drug Coordinators were highly instrumental in drumming up support for the survey. They worked very hard in encouraging treatment agencies in their regions and counties to participate in the survey. Thank you to DASA RAs: Ray Antonsen (Region 1), Ella Hanks (Region 2), Dick Jones (Regions 3), Harvey Funai (Region 4), Jim Friedman (Region 5), and John Taylor (Region 6).

Thanks to all the County Alcohol and Drug Coordinators: Kate Brueske (Adams), Sherry Crawford (Asotin), Dave Hopper (Benton and Franklin), Loretta Stover and Cathy Mulhall (Chelan and Douglas), Florence Bucierka (Clallam), Cleve Thompson (Clark), Ronald Graham (Columbia), Daniel Ward (Cowlitz), Robert Schwartz (Ferry), Gayle Fleming (Garfield), Jennifer Lane (Grant), Vera Kalkwarf (Grays Harbor), Jackie Henderson (Island), Dick Gunderson (Jefferson), Jim Vollendroff (King), Elizabeth Bosch (Kitsap), Skip Mynar (Kittitas), Kevin D. Barry (Klickitat), Holli Spanski (Lewis), Dan Pitman (Lincoln), Roger Bauer (Okanagan), Kevin Beck (Pacific), Steve Patton (Pend Oreille), Penni Newman (Pierce), Barbara LaBrash (San Juan), David Asia (Skagit), Richard Jessel (Skamania), Cammy Hart-Anderson (Snohomish), Dan Finn (Spokane), KayDee Steele (Stevens), Donna Bosworth (Thurston and Mason), Joell England Archibald (Wahkiakum), Sharon Saffer (Walla Walla), Jackie Mitchell (Whatcom), Mike Berney (Whitman), and Rodger O. Darnell (Yakima).

The members of the Statewide Bridging the Gaps Workgroup gave excellent comments on the 2002 statewide report. This report has benefited immensely from their wonderful suggestions.

Patty Terry reviewed the sections pertaining to the Department of Corrections (DOC), while Jeannie D'Amato and Ryan Pinto reviewed the sections pertaining

to the Juvenile Rehabilitation Administration (JRA) treatment programs. They provided the footnotes that put in some perspective the survey results for the DOC and JRA substance abuse treatment programs. Ron Moorhead, Department of Corrections, and the following managers from CiviGenics were instrumental in the administration of the survey at DOC treatment programs: Flo Gaskill (Northwest Region), Tom Rogers (Northeast-Spokane), Marlene Bosler (West Central), Wallace Jones (Southeast-Tri Cities), and Randy Franklin (Southwest-Thurston).

I thank those providers who participated in the 2002 Statewide Client Satisfaction Survey and responded to a follow-up survey asking how they were using their agency's survey results. Most of them allowed me to include and identify their responses in this report, and for that I am grateful. Their responses and names are found on pages 97-101.

This report also includes quotes from policy makers/implementers and other key informants describing how they used the statewide report, *Clients Speak Out 2002*. They were very kind to share their experience and to allow me to quote them. Their quotes and names are found on pages 103-107.

I thank the following DASA staff for helping in their own way with the administration of the survey and the preparation of this report: Fred Garcia, Corki Hirsch, Tonja McDougall, Amber Dassow, Dennis Malmer, Fritz Wrede, David Curts, Jean Phillips, Bob Geissinger, Julián Gonzales, Miae Christofferson, Darryl Streets, Jill Cowan, Mary Testa-Smith, Steve Brown, Pam Sacks, Emilio Vela, Harvey Perez, Sue White, Frank DiMichel, David Moore, MaryLou Blocker, Kasey Leonard, Sarah Braddock, Debbie Likely, Linda Walker, Christine Hoffman, Annabeth Goldrick, and Ira Stallsworth. Thanks to Stephen Bogan for reviewing the part on youth responses. Thanks to DASA interns David Midgorden for his skillful sorting of the surveys and Zachary Sigby for his help in printing the provider-level reports.

Thanks to: Nora Ellsworth, Research and Data Analysis Division, for sending the map that appears in Appendix C; Ron Raincloud, Administrative Services Division, for giving our mail his personal attention; Maria Martinez, Department of Printing Copy Center Ten, for accommodating our copying and printing demands; Ruben Suazo, Jennifer Buse, and Elizabeth Jarvey of Data Recognition Corporation, for shipping my printing orders always on time; and Li Yang and Nana Lowell of the University of Washington Office of Educational Assessment for giving sound advice on scanning.

Felix Rodriguez

# Executive Summary

## Background

Now in its third year, the Washington State Division of Alcohol and Substance Abuse (DASA) conducted the annual statewide client satisfaction survey during the week of March 24, 2003. The survey aims to assess clients' perception of the quality of alcohol and drug treatment services they receive. Three hundred fifty-nine or 80 percent of the certified treatment agencies in Washington State administered the survey to adult and youth clients. The survey captured 86 percent of public and 71 percent of private agencies. Overall, 15,715 clients completed the survey, representing 75 percent of clients receiving treatment in participating agencies during the week of the survey.

## Overall Findings

### Adult Clients in Community Treatment Programs

- Overall, 96 percent of adult clients participating in community treatment programs reported that they were satisfied with service received with 54 percent being very satisfied and 42 percent mostly satisfied.
- Close to 98 percent of adult clients in community treatment programs reported that staff treated them with respect with over 82 percent saying that staff treated them with respect all of the time and over 15 percent saying some of the time.
- Around 90 percent of adult clients in community treatment programs said that they would come back to the same program if they were to seek help again with over 57 percent saying they would definitely come back and over 32 percent saying they would probably come back.
- Hispanic clients completing the Spanish translation of the survey had a considerably higher proportion of those who reported being very satisfied with service received, 88 percent compared to 59 percent of Hispanic and 54 percent of non-Hispanic clients who completed the English version of the survey.
- Hispanic clients completing the Spanish translation of the survey had a higher proportion of those who reported a need for services than Hispanic and non-Hispanic clients who completed the English version, and this was true for all the types of service mentioned in the survey.
- Although a larger proportion of Hispanic clients completing the Spanish translation of the survey reported being in need of services, they appeared

to have a lower proportion of those who said that their program was helpful in assisting them to identify and find needed services compared to Hispanic and non-Hispanic clients completing the English version of the survey.

#### Youth Clients in Community Treatment Programs

- Overall, slightly over 90 percent of youth clients in community treatment programs reported that they were satisfied with service received with around 37 percent being very satisfied and nearly 54 percent mostly satisfied.
- Ninety-five percent of youth clients in community treatment programs reported that staff treated them with respect with around 74 percent saying that staff treated them with respect all of the time and 21 percent saying some of the time.
- Almost 80 percent of youth clients in community treatment programs said that they would come back to the same program if they were to seek help again with 38 percent saying they would definitely come back and 41 percent saying they would probably come back.

#### Clients in Departments of Corrections (DOC) Treatment Programs

- Overall, close to 91 percent of DOC clients reported that they were satisfied with service received with around 40 percent being very satisfied and 51 percent mostly satisfied.
- A little over 93 percent of DOC clients reported that staff treated them with respect with nearly 67 percent saying that staff treated them with respect all of the time and around 27 percent saying some of the time.

#### Clients in Juvenile Rehabilitation Administration (JRA) Treatment Programs

- Close to 77 percent of JRA clients reported that they were satisfied with service received with 13 percent being very satisfied and 64 percent mostly satisfied.
- Seventy-eight percent of JRA clients reported that staff treated them with respect with 39 percent saying that staff treated them with respect all of the time and another 39 percent saying some of the time.

### Differences Between Groups

- African American clients in methadone programs appeared to report somewhat lower levels of satisfaction with service received compared to other racial/ethnic groups, 87 percent as opposed to 94 percent for Whites, 94 percent for Native American clients, 100 percent for Hispanic clients, and 90 percent for clients of other race/ethnicity.
- Private pay and publicly funded adult clients in community treatment programs appeared to report similar levels of satisfaction with service received, 96 percent for both groups in intensive inpatient, 97 percent and 96 percent respectively in outpatient, and 92 percent and 95 percent respectively in methadone.\*
- Regardless of modality in community treatment programs, adult clients appeared to be more satisfied with service received than youth clients.
- African American youth clients in community outpatient treatment programs appeared to report lower levels of satisfaction with service received compared to other racial/ethnic groups, 82 percent as opposed to 92 percent for Whites, 87 percent for Native American youth, 91 percent for Hispanic youth, and 92 percent for youth clients of other race/ethnicity.
- Private pay and publicly funded youth clients in community outpatient treatment programs reported similar levels of satisfaction with service received.
- There was only a small difference between community outpatient and DOC outpatient treatment programs in clients' reported satisfaction with service received.

---

\*Recovery house and long term residential programs were not included in this comparison because of the small number of private pay clients in these modalities.

# Introduction

## Purpose of the Survey

The Washington State Division of Alcohol and Substance Abuse (DASA) conducted the Third Annual Statewide Client Satisfaction Survey during the week of March 24, 2003. The survey aims to assess clients' perception of the quality of alcohol and drug treatment services they receive. Aside from this report, which presents the statewide summary of the survey results, DASA also prepares county-level reports and individual, confidential reports for each of the participating treatment agencies. DASA hopes that the client feedback information contained in the statewide, county, and provider-level reports will serve its mission of continuing to improve the quality of alcohol and drug treatment services in Washington State.

## Administration of the Survey

Three hundred fifty-nine certified treatment providers in Washington State, composed of 70 percent adult programs, 12 percent youth, and 18 percent adult and youth programs, administered the survey. Agency participation was voluntary. The table below shows the distribution of participating agencies by region. At least over 70 percent of treatment agencies in each region volunteered to participate. The 359 agencies represented a little over 80 percent of the 447 certified alcohol and drug treatment agencies that, as of December 27, 2002, were operating in Washington State. The survey captured 86 percent of public and 71 percent of private agencies.\*

**Regional Distribution of Substance Abuse Treatment Agencies Participating in the 2003 Statewide Client Satisfaction Survey**

Region*	Participating Providers		Non-Participating Providers		Total (100%)
	Number	Percent (%)	Number	Percent (%)	
Region 1	45	78.9	12	21.1	57
Region 2	39	83.0	8	17.0	47
Region 3	43	70.5	18	29.5	61
Region 4	86	73.5	31	26.5	117
Region 5	63	87.5	9	12.5	72
Region 6	83	89.2	10	10.8	93
<b>Total</b>	<b>359</b>	<b>80.3</b>	<b>88</b>	<b>19.7</b>	<b>447</b>

\*See map on page 179, Appendix C.

During the week of March 24, 2003, participating providers asked all of their clients who were participating in treatment to complete the client satisfaction survey. The survey included an adult and a youth version in English and Spanish. Providers returned completed surveys to DASA for processing and analysis. As the following table shows, DASA received a total of 15,715

\*See page 109 for details.

completed surveys representing 75 percent of the clients receiving treatment in the participating agencies during the week of the survey.\* Clients who completed the survey consisted of 85 percent community adults, over eight percent community youth clients, six percent Department of Corrections (DOC) clients, and half of a percent Juvenile Rehabilitation Administration (JRA) clients.

**Number of Substance Abuse Treatment Clients Completing  
the 2003 Statewide Client Satisfaction Survey by Treatment Modality and Category**

Treatment Modality		Adult		Youth		Total	
		Community	DOC	Community	JRA**	Number	Percent (%)
Intensive Inpatient		511		126*	42	679	4.3
Recovery House		149		17*	14	180	1.1
Long Term Residential		334	226			560	3.6
Outpatient/Intensive Outpatient		10,919	740	1,188	21	12,868	81.9
Methadone		1,428				1,428	9.1
<b>Total</b>	<b>Number</b>	13,341	966	1,331	77	15,715	
	<b>Percent (%)</b>	84.8	6.1	8.5	.5		100.0

\*In this report, community youth responses from intensive inpatient and recovery house were combined in a single "residential category" to protect the identity of the *one* youth recovery house participating in the survey.

\*\*JRA client responses were collapsed in order to protect the identity of the *one* JRA recovery house and *one* JRA outpatient program participating in the survey.

Overall, as the table above shows, almost 82 percent of the clients completing the survey were enrolled in outpatient/intensive outpatient (OP/IOP) treatment programs, nine percent in residential treatment, and another nine percent in methadone programs.

### Interpretation of Survey Results

Results of the survey are given in percentages. In comparing treatment modalities or groups, this report uses the following guide: a difference of five percent or less is considered small or negligible; between six percent and ten percent is modest; over ten percent is large.

### Organization of the Report

This report presents the survey responses for each of the four client groups identified above. The results are aggregated on a state level and are broken down by treatment modality except for JRA clients. The chapters divide mainly into a section for adult and another section for youth responses. The adult section divides into community and DOC treatment programs, while the youth section splits into community and JRA treatment programs. The report also includes a section on how providers used their last year's survey results and a section on how policy makers used the 2002 statewide report. The *Technical Notes* section (page 109) presents more information about the administration of the survey. The charts presented in the report are based on the tables that appear in Appendix A (pages 111-164). The survey instruments and administration guidelines can be found in Appendix B (165-175).

\*See page 110 for details.

## **Part 1: Adult Responses**

### ***Adult Responses in Community Treatment Programs by Modality***

## Satisfaction with Service Received

- Overall, 96 percent of adult clients participating in community treatment programs reported that they were satisfied with service received with 54 percent being very satisfied and 42 percent mostly satisfied.
- In residential programs,\* clients enrolled in intensive inpatient and recovery house had a higher proportion of those reporting that they were very satisfied with service received than those in long term residential.
- Across modalities, outpatient programs had the highest proportion of clients reporting that they were very satisfied with service received, 56 percent.
- In methadone programs, there was only a small difference between the proportion of clients who were very satisfied and of those who were mostly satisfied with service received.

### Q1. In an overall, general sense, how satisfied are you with the service you have received?

SOURCE: Table 1a, Appendix A.

\*From here on, residential programs refer to intensive inpatient, recovery house, and long term residential.

## Satisfaction with Comfort and Appearance of Facility

- Ninety-five percent of adult clients enrolled in community treatment programs reported that they were satisfied with the comfort and appearance of their facility with 53 percent being very satisfied and 42 percent mostly satisfied.
- In residential programs, clients in intensive inpatient and recovery house had a higher proportion of those reporting that they were very satisfied with the comfort and appearance of their facility than those in long term residential.
- Nearly 55 percent of outpatient clients reported that they were very satisfied with the comfort and appearance of their facility.
- Methadone programs had an almost equal proportion of clients who were very satisfied and mostly satisfied with the comfort and appearance of their facility.

### Q2. In general, how satisfied are you with the comfort and appearance of this facility?

SOURCE: Table 1a, Appendix A.

## Respect from Staff

- Overall, close to 98 percent of adult clients in community treatment programs reported that staff treated them with respect with over 82 percent saying that staff treated them with respect all of the time and over 15 percent saying some of the time.
- Among residential clients, those in intensive inpatient and recovery house had a higher proportion of clients reporting that staff treated them with respect all of the time compared to those in long term residential.
- Around 87 percent of clients in outpatient community programs reported that staff treated them respect all of the time, the highest proportion across modalities.
- Sixty-four percent of methadone clients reported that staff treated them with respect all of the time.

### Q3. Would you say our staff treated you with respect?

SOURCE: Table 1a, Appendix A.

## Helpfulness of Group Sessions

- Overall, around 92 percent of adult clients in community treatment programs rated the group sessions as being helpful with over 59 percent saying they were very helpful and over 32 percent saying they were somewhat helpful.
- Clients in intensive inpatient and recovery house had a higher proportion of those who rated the group sessions as being very helpful compared to those in long term residential.
- Sixty-two percent of adult clients in community outpatient programs reported that the group sessions were very helpful.
- Methadone clients had the same proportion of clients who rated the group sessions as very helpful and somewhat helpful.

### Q4. How do you rate the helpfulness of the group sessions?

SOURCE: Table 1a, Appendix A.

## Helpfulness of Individual Counseling

- Over 86 percent of adult clients in community treatment programs rated individual counseling as helpful with nearly 61 percent saying it was very helpful and almost 26 percent saying it was somewhat helpful.
- Within residential programs and across modalities, clients enrolled in recovery house had the highest proportion of those who rated individual counseling as very helpful, 73 percent.
- Close to 62 percent of outpatient clients rated individual counseling as very helpful.
- In methadone programs, around 54 percent of clients rated individual counseling as very helpful.

### Q5. How do you rate the helpfulness of the individual counseling?

SOURCE: Table 1a, Appendix A.

## “...Would you come back to this program?”

- Around 90 percent of adult clients in community treatment programs said that they would come back to the same program if they were to seek help again with over 57 percent saying they would definitely come back and over 32 percent saying they would probably come back.
- Among residential clients, those in recovery house had the highest proportion of clients reporting that they would definitely come back to the same program if they were to seek help again, while long term residential clients were almost evenly split between those who would definitely and those who would probably come back to the same program.
- Fifty-seven percent of outpatient clients reported that they would definitely come back to the same program if they were to seek help again.
- Around 65 percent of methadone clients said that they would definitely come back to the same program, the highest proportion across modalities, although just slightly higher than that of recovery house.

### Q6. If you were to seek help again, would you come back to this program?

SOURCE: Table 1a, Appendix A.

## Need for Legal Services

Overall, 30 percent of adults enrolled in community treatment programs reported a need for legal services. Across modalities, the proportion of clients who needed legal services varied from 16 percent among methadone clients, 25 percent among intensive inpatient clients to over 30 percent among recovery house, long term residential, and outpatient clients.

**Q7. Did you need legal services?**

SOURCE: Table 1b, Appendix A.

## Helpfulness in Identifying and Finding Legal Services

Among those who needed legal services, 72 percent overall rated their program as being helpful in assisting them to identify and find legal services with 44 percent saying their program was very helpful and 28 percent saying it was somewhat helpful. Across modalities, except for recovery house, where there was a relatively small number of clients needing this service, between 31 percent and 45 percent of clients needing legal services rated their program as very helpful in assisting them to identify and find legal services.

**Q7a. IF YES, how helpful were we in assisting you to identify and find legal services?**

SOURCE: Table 1b, Appendix A.

## Need for Medical Services

Overall, 26 percent of adult clients in community treatment programs expressed a need for medical services. As a group, between 57 percent and 81 percent of residential clients reported a need for medical services, compared to around 21 percent of outpatient and 40 percent of methadone clients.

Q8. Did you need medical services?

SOURCE: Table 1b, Appendix A.

## Helpfulness in Identifying and Finding Medical Services

Nearly 78 percent of those needing medical services rated their program as being helpful in assisting them to identify and find medical services with nearly 51 percent saying it was very helpful and 27 percent saying it was somewhat helpful. Seventy-five percent of recovery house clients reported that their program was very helpful in assisting them to identify and find medical services, the highest proportion within residential treatment and across modalities.

Q8a. IF YES, how helpful were we in assisting you to identify and find medical services?

SOURCE: Table 1b, Appendix A.

## Need for Family Services

Overall, 15 percent of adults in community treatment programs reported a need for family services. Among residential clients, 38 percent of long term residential clients expressed a need for family services compared to 26 percent of intensive inpatient and around 28 percent of recovery house clients. Between 14 percent and 17 percent of outpatient and methadone clients reported that they needed family services.

**Q9. Did you need family services?**

SOURCE: Table 1b, Appendix A.

## Helpfulness in Identifying and Finding Family Services

Among those who needed family services, nearly 72 percent rated their program as being helpful in assisting them to identify and find family services with over 46 percent saying it was very helpful and more than 25 percent saying it was somewhat helpful. As a group, over 50 percent of residential clients reported that their program was very helpful in assisting them to identify and find family services.

**Q9a. IF YES, how helpful were we in assisting you to identify and find family services?**

SOURCE: Table 1b, Appendix A.

Forty-six percent of outpatient and 39 percent of methadone clients reported that their program was very helpful in assisting them to identify and find family services.

## Need for Mental Health Services

Close to 21 percent of adults in community treatment programs expressed a need for mental health services. Around 40 percent of recovery house and long term residential clients reported a need for mental health services compared to 28 percent of intensive inpatient clients. Almost 18 percent of outpatient clients and around 31 percent of methadone clients reported a need for mental health services.

**Q10. Did you need mental health services?**

SOURCE: Table 1b, Appendix A.

## Helpfulness in Identifying and Finding Mental Health Services

Seventy-two percent of adults needing mental health services rated their program as being helpful in assisting them to identify and find mental health services with close to 47 percent saying it was very helpful and around 26 percent saying it was somewhat helpful. Across all the treatment modalities, between 40 percent and around 49 percent of clients needing mental health services rated their program as very helpful in assisting them to identify and find mental health services.

**Q10a. IF YES, how helpful were we in assisting you to identify and find mental health services?**

SOURCE: Table 1b, Appendix A.

## Need for Educational or Vocational Services

Overall, 15 percent of adult clients in community treatment programs reported that they needed educational or vocational services. Almost 37 percent of recovery house and around 40 percent of long term residential clients said they needed educational or vocational services compared to 21 percent of intensive inpatient clients. Nearly 14 percent of outpatient and around 18 percent of methadone clients expressed a need for educational or vocational services.

Q11. Did you need educational or vocational services?

SOURCE: Table 1b, Appendix A.

## Helpfulness in Identifying and Finding Educational or Vocational Services

Overall, around 61 percent of those needing educational or vocational services rated their program as being helpful in assisting them to identify and find these services with close to 34 percent saying it was very helpful and 27 percent saying it was somewhat helpful. Across all the treatment modalities, except for recovery house, where the number of clients needing these services was smaller compared to others, between 22 percent and 38 percent of clients needing educational or vocational services rated their program as very helpful in assisting them to identify and find these services.

Q11a. IF YES, how helpful were we in assisting you to identify and find educational or vocational services?

SOURCE: Table 1b, Appendix A.

## Need for Employment Services

Overall, 15 percent of adult clients in community treatment programs reported that they needed employment services. Among residential clients, 38 percent of recovery house and 36 percent of long term residential clients said they needed employment services compared to 22 percent of intensive inpatient clients. Nearly 14 percent of outpatient and 17 percent of methadone clients said they needed employment services.

Q12. Did you need employment services?

SOURCE: Table 1b, Appendix A.

## Helpfulness in Identifying and Finding Employment Services

Among those who needed employment services, over 50 percent rated their program as being helpful in assisting them to identify and find employment services with around 27 percent saying it was very helpful and 24 percent saying it was somewhat helpful. Compared to those in other modalities, intensive inpatient and methadone clients who needed this service had a lower proportion of clients, around 16 percent, saying that their program was very helpful in assisting them to identify and find employment services.

Q12a. IF YES, how helpful were we in assisting you to identify and find employment services?

SOURCE: Table 1b, Appendix A.

## **“What do you like about this program?”**

### **Intensive Inpatient: Selected Responses**

“I like that the education focus is on old behavior changes to help with recovery, and there is substantial information for relapse prevention. I have also received sufficient amount of info and tools for regaining self-confidence as well as relapse prevention.”

“It helped to understand what my alcohol addiction was as well as teaching me the tools I will need to succeed when I leave the center.”

“I think it’s a great approach to learning about myself and dealing with life and change behaviors. I’ve been in other treatments and this is great.”

“The way they treat the patients with respect and not like drug addicts or criminals. Counselors are very good and see people as individuals.”

“Group therapy and intensive one-on-one counseling.”

“The openness and very friendly environment. The program is very pro—my recovery. It is like a family.”

“This is a clean and healthy environment. I also enjoy the contact with my social worker and other workers. I am also pleased with most all of the people that I participate within the program.”

“The respect for culture and spirituality. The focus on individual issues, being able to go outside and walk, shoot hoops, volleyball. I like the ineipi (sweat lodge). The privilege to do our native drumming and singing.”

### **Recovery House: Selected Responses**

“I feel the counselors and care team are very dedicated to their jobs and are sincere to the cause. I am learning about spirituality, positive thinking, assertiveness, relapse triggers, major stressors.”

“Not only have I been treated with respect, I feel this place will help me grow.”

“The understanding staff, the classes, and the helpfulness with finding resources.”

“The staff is very friendly and helpful. They have helped with some personal problems and I got them resolved.”

“The safe environment to stay clean and sober and the help with transition between treatment and living on my own. Sober support.”

“The discipline and routine. There is great emphasis on recovery and a real sense of family and camaraderie. Also, a sense of ‘order’ and ‘structure’ in a sober reality—without chaos. It’s very grounding.”

“Process group and lectures are excellent.”

“It gives me more of an opportunity to work on a relapse prevention program, a chance to get my G.E.D. and last but not least adapting to going to more and more AA meetings.”

### **Long Term Residential: Selected Responses**

“What I love about this program is it’s teaching me more about myself... I’m learning boundary skills and communication, which is very helpful to me in my recovery. I’m glad I came back here for my 2<sup>nd</sup> time instead of somewhere else.”

“That the professional staff here really cares for people out of their hearts. And that this is the first treatment program I successfully completed for the whole 6 months and now this is my 2<sup>nd</sup> time back and I will make it this time.”

“I really like the fact that I am finally learning that my behavior has stood in the way of my sobriety not vice versa. I am gaining self worth and a new attitude towards life. I am learning who I really am and I am finally willing to be honest enough to let go of my part by facing what I have done and how I have behaved—realistically.”

“This program has helped me grow so much. It has raised my self-esteem immensely. Thank you!”

“I have been able to change my life, my behaviors. Learn the tools to stay clean and sober and be a great single mother to my children.”

“The fact that we have our children with us and we don’t have to worry about childcare and who’s going to babysit.”

“The counselors here are very good and very qualified. They help me with any problems I have and point out any behaviors I might have. My counselor gives me work on specific behaviors that I have like co-dependent and being passive. I also learn good work skills and healthy boundaries and I am doing step work. Also it’s a very good program.”

“The staff is great! Very concerned and helpful. It’s helped me immensely to look at my behaviors and is helping me to find out who I am. Is giving me invaluable tools to help me fight my addiction.”

“I love the fact that I have grown within so much, not to mention the structure and parenting skills I’ve learned from being here in this program.”

### **Outpatient/Intensive Outpatient: Selected Responses**

“The convenience of being able to work around my work schedule is by far the best part of the program. The people are all very friendly and more than willing to help you no matter what, which is awesome and really makes attending class a lot easier.”

“I like that this program was easy to get into and promptly. The treatment center did a great job for my confidence, health, and reuniting me with my family.”

“I very much enjoy the counselors. They are compassionate and also keep a good control of the program. (Name of counselor) is very sweet, too. The materials covered in groups have been instrumental in my success. I became very dependent on the support initially and learned to become well and independent.”

“I like the comfortable environment and also enjoy the respect given to me by the counselors. I also like the fact that the info given to me are by people who have been through the same disease I’m now getting treated for.”

“It’s very informative. Helps me to realize that I do have a problem and coming to class with other people like me helps me to stay strong and take pride in my sobriety.”

“Camaraderie and sharing experiences, educational info about alcoholism, encouragement that there is hope of recovery.”

“The counselors are helpful rather than harassing—the group is open and supportive—the program is insightful and informative.”

“I like that the more you are in compliance, the less groups you need to go to. I went from 2x a week to once a week.”

“The educational aspect is very informative. No one can recover without the proper education about the disease.”

“I really like the individual sessions. And the hand you receive whenever you’re in need. And the understanding whenever you have a problem.”

“The major highlight of this class, in my personal opinion, is the friendliness of the staff. This provides a comfortable learning environment for all patients, no matter what their personal dilemmas may be.”

“The staff have not only been very understanding about my situation, but they have also helped me understand that I’m not alone and many other people have gone through both legal and personal struggles and now lead very productive lives.”

“The people here are very personable and seem like they really care and are genuinely concerned about how you’re doing. They don’t just act like they are here only to collect a paycheck like other places I’ve been to before.”

“Outpatient treatment’s long term nature—helped me stay sober long enough to find my way out of drinking—kept me in tune with my sobriety plan.”

### **Methadone: Selected Responses**

“I like the intense counseling and group therapy that helped me in the very beginning of my time on the program. I truthfully believe that the program changed my life. It took me years to recondition myself to live a normal life and to alter behavior patterns that were destroying my life. The program literally saved me.”

“I like the dispensary nurses, the fact that they look at your card and picture after I state my name, they restate my name, tell me what my dose is, double check for accuracy, and then state the amount of my dose again. I like the receptionists too. I like several of the counselors but I don’t think my specific counselor is a good match because I don’t feel that our sessions are beneficial.”

“The personal dedication to helping us be integrated back into society and assist in becoming productive citizens once again. This program is a life saver.”

“Recently, the program underwent some policy changes. Since the change occurred, I have found that I am much more satisfied with the program. The overall program seems much more concerned with client success in treatment, including utilizing more individualized assessment and approach when necessary. Emphasis on compliance and punishment only serves to create animosity and distance between clients and program rather than trust and working relationship.”

“Staff is respectful and courteous—methadone helps you adjust to a more normal life if you want to.”

“We are real people and you treat us as such—no discrimination like on the outside. People (staff, too) are genuine here. I am comfortable and want to do well because of this.”

“My counselor cares genuinely. He is so eager to help. Never hardly ever in today’s society do I find that. That makes it feel like a team effort, like I’m not having to recover alone. No druggy behavior is allowed in the clinic or outside the common area. No one is allowed to just hang out. There have been times I wanted to get high and had no drug friends anywhere to get drugs from. If there had been people hanging out here at that time, I’m sure I could have found drugs. Thank heavens for that rule.”

## **“Is there anything you would change about this program?”**

### **Intensive Inpatient: Selected Responses**

“The constant on the go—one thing to another, mandatory meetings I must attend which leaves me always asking what’s next.”

“I strongly believe mental health counselors need to be involved with treatment. Not treatment before the M.H. counseling; it’s a combined process and would boost the success of this facility.”

“Patients new to treatment may benefit by more one-on-one interaction with staff—possibly interns.”

“Tighter screening on mental illness or a qualified mental health counselor on sight.”

“Counselors and staff overstepping boundaries. They tell us to set boundaries, but they step on them. Ask counselors to write down what they say to you so that they don’t forget when you ask about it later.”

“Co-ed and more understanding associates that don’t talk about people behind their back and more comfortable chairs to sit 8 hours a day.”

“Less choice time, more group time, more assignments, more meetings AA, NA, CA. Try to get some inside meetings started.”

### **Recovery House: Selected Responses**

“More attention to relapse prevention and less on things like parenting, manners, careers.”

“Change the vagueness of lectures—mixing of intensive and recovery stages and better communication of care team in tackling issues.”

“Yes, the structure, the repetitiveness, the holier than thou supervisors. Less mental health, more addiction tools.”

“Yes, the no smoking. But I know that won’t change so other than that there’s nothing I would change. Oh yeah, I guess I would have liked my own room.”

“How about the whole building! The dishwasher barely works for god’s sakes, more information about education and maybe a phone that doesn’t help eat the tiny checks that is supposed to last the whole month.”

### **Long Term Residential: Selected Responses**

"I would like to change the day care because I believe one of the staff members is using."

"The negativity from the other peers and the confidentiality and the gossiping. But otherwise, I liked it better last time I was here. I am less comfortable this time and the peers are much different. And we are all equal and adults."

"I think that there should be a class on unity and on the importance of caring for one another in recovery and how part of working a program and changing old behaviors is for women to focus on being more supportive towards one another."

"The staff needs a raise whatever it is they're paid, it's not enough. Need more long term houses available to everyone."

"Yes, I would like to have a little more freedom within the first 6 months. Overall, the program has helped me turn my life around and for that I am thankful."

"More counselors, client interaction, more involved with intense recovery issues (not just classes), more intensive therapy groups, clients responsible to change."

"I think candy or coffee should be allowed. Even if it's sugar free, caffeine free. That would help a lot of people in dealing with the stress of recovery and not smoking."

### **Outpatient/Intensive Outpatient: Selected Responses**

"Make it less expensive. Also make public funding more easily available. New chairs, more comfortable. Larger TV/DVD with updated videos."

"More funds from state and federal so people can get the help we need for people that don't make much money."

"Cost. Do not put good people in jail because they don't have money, if they are not a harm to the people around them."

"Maybe cut out the 4 times a week or at least cut the time in half, it was just too much time consuming with working 40 hours to pay for treatment and with going to school. More videos."

"Bring in outside professional counselors for some sessions. More educational group meetings—less rambling on and on as counselor loses control."

"My personal opinion is that some of the counselors need to be reevaluated and get more training. The front desk help is not very helpful. The building is very bleak and seems like somewhat like a person feels."

“Being able to have more than one visit a day. Some chairs or benches out for smokers, maybe even umbrellas. Rotating counselors might be helpful.”  
“More Native American resources.”

“The program isn’t bad but the people here make me feel like a criminal and or a bad person just because I made one bad decision in my life.”

“You have pop machines but no coffee machines. Go figure. Pop has caffeine.”

“Smaller groups (if) possible—keeping people on the subject as in AA groups—not wasting (expensive) group time on people’s irrelevant stories about other people’s problems.”

“I believe the counselors deserve more money because they are improving society for tomorrow.”

“Only maybe a program for our children to understand our addiction.”

“Reduce the amount of “homework”. It’s almost like they intentionally give you so much homework that you don’t have time to get drunk even if you wanted to.”

“Have some counselors focus more on group problems rather than just preaching recovery. Listen to everybody.”

“More depth on the underlying issues of why alcohol was abused and learning more of ourselves and getting feedback.”

“Yes, I would have smaller groups, it’s more comfortable and you get to know others better.”

“Smaller after-care groups—after-care groups, in my opinion, should be based on solutions on how we stayed clean and sober for the last 24 hours.”

“The one thing I would change about the program would be to include some aspects of AA so that each meeting that a person attends they could get signatures for there AA attendance sheet.”

“I would get rid of (name). It is difficult for someone with no prior drug or alcohol problem to relate to or understand cravings, urges, etc. He seems more interested in football than treatment.”

“More educational handouts, have topics for after-care, a bit more work writing, thinking, problem-solving. People tend to hold back if given the opportunity. Most people in recovery need to be pushed or led through recovery.”

"I would like to be in a group of people who want to be here. Being in a group of people who are all court-ordered is a little disconcerting. I question whether or not they really want to be sober. I would rather be in a group of people who really want to be here."

"Would be working on putting together another program for people who just left treatment so we don't repeat everything twice."

"Some of the counselors are controlling and think they always know what is best. I'm staying sober but certain outcomes can lie in their hands. They can hurt the situation."

"I would like an overview of the program prior to being put in a class to have had explained to me my responsibilities and requirements to not be treated as a less than an acceptable member of the human race, who will succeed in this program as opposed to one who will not."

### **Methadone: Selected Responses**

"If I could change anything about the program, I would reinstate the exercise program they had years ago; it is especially helpful for people in the early stages of treatment because the lifestyle of drug addicts does not necessarily encourage exercise. We were also allowed to bring our dogs and walk them as part of the program. Thank you."

"The attitude of the staff towards the patients. A better UA and prescription registration program. You can't find anyone to register a script—yet you get in trouble when it's not done on time. And the patients are never given the benefit of the doubt."

"Treat people with more dignity. Don't threaten every one with detox for anything."

"Location—I live in (name), this is the closest meth center. Would like closer location—more North."

"We would have a clinic closer than 100 miles to our house. Plus we would be allowed to have carries before 6 months."

"It would open at 5 a.m. thru 6 a.m. for clients that work in the early morning. A lot of clients have been late for work and consequently not had good luck with jobs."

"To let people have carries if they are clean even if they have no job or no children. Gas is expensive and coming everyday is a lot of \$; I have been clean a long time, I should get carries."

## ***Adult Client Satisfaction in Community Treatment Programs: Differences Between Groups***

## Did client satisfaction differ between males and females?

### Satisfaction with Service Received

Males in long term residential appeared to be somewhat more satisfied than females with service received, 96 percent versus 90 percent. Levels of satisfaction among males and females appeared similar in intensive inpatient and recovery house (two-percent difference), although the result for recovery house must be interpreted with caution because there were only

51 female clients participating in recovery house programs. Males and females in outpatient and methadone did not show any difference in the proportion of clients saying they were satisfied with service received.

**Percent of Clients Satisfied with Service Received by Modality and Gender\***

SOURCE: Table 2a, Appendix A.

### Respect from Staff

The proportion of males and females reporting that staff treated them with respect did not show appreciable differences within and across treatment modalities. The exception was in long term residential where more males than females reported that staff treated them with respect, a difference of around six percent.

**Percent of Clients Reporting that Staff Treated Them with Respect by Modality and Gender\*\***

SOURCE: Table 2a, Appendix A.

\*Included clients who reported that they were very or mostly satisfied with service received.

\*\*Included clients who reported that they were treated with respect all or some of the time.

## Did client satisfaction vary among racial/ethnic groups?

### Satisfaction with Service Received

The small number of clients in intensive inpatient, recovery house, and long term residential prevented any fair comparison of this measure across racial/ethnic groups (see Table 2b, Appendix A). In outpatient programs, where the number of cases was adequate to make such a comparison, racial/ethnic groups did not appear to differ with respect to the proportion of clients saying they were satisfied with service received. The most variation in this measure can be observed among methadone clients (see chart on the right) where the proportion of those saying they were satisfied with service received was somewhat lower among African American clients compared to other groups.

Percent of Clients Satisfied with Service Received in Methadone Programs by Race/Ethnicity\*

SOURCE: Table 2b, Appendix A.

### Respect from Staff

Likewise, the small number of residential clients did not allow a fair comparison of this measure across racial/ethnic groups (see Table 2b, Appendix A). Among outpatient clients, however, where there were adequate numbers to make such a comparison, racial/ethnic groups had the same proportion of clients saying that staff treated them with respect. In methadone, the proportion of clients saying that staff treated them with respect was somewhat lower among African Americans compared to other groups (see chart on the right).

Percent of Clients Reporting that Staff Treated Them with Respect in Methadone Programs by Race/Ethnicity\*\*

SOURCE: Table 2b, Appendix A.

\*Included clients who reported that they were very or mostly satisfied with service received.

\*\*Included clients who reported that they were treated with respect all or some of the time.

## Did client satisfaction vary by length of stay in treatment?

### Satisfaction with Service Received

When grouped by varying lengths of stay in treatment, adult clients in community treatment programs showed only small differences within modalities with respect to satisfaction with service received (see Table 2c, Appendix A). This was true for all the treatment modalities except for long term residential (see chart on the right) where the proportion of clients saying they were satisfied with service received was somewhat lower for those who had been in treatment for 30 days or less compared to those who had been in treatment for 31 days and over.

Percent of Clients Satisfied with Service Received in Long Term Residential by Length of Stay\*

SOURCE: Table 2c, Appendix A.

### Respect from Staff

With respect to this measure, adult clients did not show any appreciable differences when grouped by varying lengths of stay in intensive inpatient, recovery house, outpatient, and methadone (see Table 2c, Appendix A). However, for long term residential clients, the proportion of those saying that staff treated them with respect was somewhat lower for clients who had stayed in treatment for over 60 days compared to those who had stayed 60 days or less (see chart on the right).

Percent of Clients Reporting Staff Treated Them with Respect in Long Term Residential by Length of Stay\*\*

SOURCE: Table 2c, Appendix A.

\*Included clients who reported that they were very or mostly satisfied with service received.

\*\*Included clients who reported that they were treated with respect all or some of the time.

## Did private pay and publicly funded clients differ in client satisfaction?

### Satisfaction with Service Received

The number of private pay clients in recovery house and long term residential did not allow for a valid comparison with publicly funded clients (see Table 2d, Appendix A). With respect to other modalities, however, the proportion of clients saying they were satisfied with service received was almost the same between private pay and publicly funded clients in intensive inpatient, and only a small difference can be observed between them in outpatient and methadone programs (see chart on the right).

**Percent of Clients Satisfied with Service Received by Modality and Funding\***

SOURCE: Table 2d, Appendix A.

### Respect from Staff

Recovery house and long term residential had too small a number of private pay clients to permit any comparison with publicly funded clients (see Table 2d, Appendix A). Intensive inpatient programs showed a small difference between private pay and publicly funded clients in the proportion of those who reported that staff treated them with respect (see chart on the right). Private pay and publicly funded clients in outpatient and methadone programs did not show any difference in the proportion of those saying that staff treated them with respect.

**Percent of Clients Reporting that Staff Treated Them with Respect by Modality and Funding\*\***

SOURCE: Table 2d, Appendix A.

\*Included clients who reported that they were very or mostly satisfied with service received.

\*\*Included clients who reported that they were treated with respect all or some of the time.

## ***English and Spanish Versions of the Adult Client Satisfaction Survey Compared***

## Was there a difference in client satisfaction between Hispanic clients who completed the Spanish translation and Hispanic and non-Hispanic clients who completed the English version of the survey?

### Satisfaction with Service Received

All of the completed surveys in Spanish came from adult community outpatient treatment programs. The chart on the right compares three groups of community outpatient adult clients. Hispanic clients completing the Spanish translation of the adult client satisfaction survey had a considerably higher proportion of those who reported being very satisfied with service received, 88 percent compared to 59 percent of Hispanic and 54 percent of non-Hispanic clients who completed the English version of the survey.

**Q1. In an overall, general sense, how satisfied are you with the service you have received?**

### Respect from Staff

Hispanic clients who completed the Spanish translation of the survey showed a higher proportion of those saying that staff treated them with respect all of the time, 92 percent compared to around 86 percent of Hispanic and 86 percent of non-Hispanic clients completing the English version of the survey.

**Q3. Would you say our staff treated you with respect?**

## Need for Services

Hispanic clients completing the Spanish translation of the survey had a higher proportion of those who reported a need for services than Hispanic and non-Hispanic clients completing the English version of the survey, and this was true for all the types of service mentioned in the survey. The two most common types of service needed by Hispanic clients completing the Spanish translation were legal services, 68 percent, and medical services, nearly 54 percent. Over 40 percent of Hispanic clients completing the Spanish translation reported a need for family services, educational or vocational services, and employment services.

**Comparing Need for Services Among the Three Groups: Hispanic Clients Completing the Spanish Translation and Hispanic and Non-Hispanic Clients Completing the English Version**

SOURCE: Table 3b, Appendix A.

## Helpfulness of Treatment Program in Identifying and Finding Needed Services

Although a larger proportion of Hispanic clients completing the Spanish translation of the survey reported being in need of services, they appeared to have a lower proportion of those who said that their program was helpful in assisting them to identify and find needed services compared to the other two groups. For example, among Hispanic clients who completed the Spanish translation and were in need of legal services, 59 percent reported that their program was helpful in assisting them to identify and find this service compared to 79 percent of Hispanic and 75 percent of non-Hispanic clients who completed the English version of the survey and were in need of legal services.

**Comparing the Three Groups on Client Ratings of Treatment Program's Helpfulness in Assisting Clients to Identify and Find Needed Services\***

SOURCE: Table 3b, Appendix A.

\*Included clients saying their program was very helpful or somewhat helpful in assisting them to identify and find services they needed.

***Three-Year Trend in Adult Client Satisfaction  
in Community Treatment Programs by  
Modality***

## Satisfaction with Service Received

- Between 2001 and 2003, there was a small increase in the proportion of clients reporting that they were satisfied with service received in intensive inpatient and long term residential modalities.
- In recovery house, the proportion of clients reporting that they were satisfied with service received increased by eight percent from 91 percent in 2001 to 99 percent in 2003.
- The proportion of outpatient clients reporting that they were satisfied with service received remained at the same level, around 97 percent, during the three-year period.
- The proportion of methadone clients reporting that they were satisfied with service received showed a small increase from 91 percent in 2001 to 93 percent in 2003.

**Percent of Adult Clients in Community Treatment Programs Reporting They Were Satisfied with Service Received, by Modality and Year\***

SOURCE: Tables 4a, 4b, 4c, 4d, and 4e, Appendix A.

\*Included clients who reported that they were very or mostly satisfied with service received.

## Respect from Staff

- The proportion of clients reporting that staff treated them with respect changed very little during the three-year period in intensive inpatient and long term residential.
- In recovery house, the proportion increased by five percent from 94 percent in 2001 to almost 99 percent in 2003.
- The proportion of outpatient clients reporting that staff treated them with respect remained at around 98 percent during the three-year period.
- For methadone, the proportion of clients reporting that staff treated them with respect fluctuated between 95 percent and 93 percent.

**Percent of Adult Clients in Community Treatment Programs Reporting that Staff Treated Them with Respect, by Modality and Year\***

SOURCE: Tables 4a, 4b, 4c, 4d, and 4e, Appendix A.

\*Included clients who reported that they were treated with respect all or some of the time.

***Adult Responses in Department of  
Corrections (DOC) Treatment Programs by  
Modality***

## Satisfaction with Service Received

Overall, close to 91 percent of DOC clients reported that they were satisfied with service received with around 40 percent being very satisfied and 51 percent mostly satisfied. Forty-seven percent of DOC outpatient clients reported that they were very satisfied with service received compared to around 15 percent of DOC long term residential clients.

**Q1. In an overall, general sense, how satisfied are you with the service you have received?**

SOURCE: Table 5a, Appendix A.

## Satisfaction with Comfort and Appearance of Facility

DOC clients participate in treatment programs that are provided within an institutional environment. Around 82 percent of DOC clients reported that they were satisfied with the comfort and appearance of their facility with almost 24 percent being very satisfied and nearly 58 percent mostly satisfied. DOC outpatient programs had a higher proportion of clients who reported that they were very satisfied

**Q2. In general, how satisfied are you with the comfort and appearance of this facility?\***

SOURCE: Table 5a, Appendix A.

with the comfort and appearance of their facility than those in DOC long term residential programs, around 29 percent versus eight percent.

\*Please note that compared to community treatment programs, DOC programs take place in an institutional setting and, therefore, this question may elicit more unfavorable responses from DOC clients.

## Respect from Staff

Overall, a little over 93 percent of DOC clients reported that staff treated them with respect with nearly 67 percent saying that staff treated them with respect all of the time and around 27 percent saying some of the time. Over 74 percent of DOC outpatient clients reported that staff treated them with respect all of the time compared to around 42 percent of DOC long term residential clients.

**Q3. Would you say our staff treated you with respect?**

SOURCE: Table 5a, Appendix A.

## Helpfulness of Group Sessions

Overall, around 94 percent of DOC clients reported that the group sessions were helpful with little over 52 percent saying they were very helpful and over 41 percent saying they were somewhat helpful. Fifty-seven percent of DOC outpatient clients reported that the group sessions were very helpful compared to 36 percent of DOC long term residential clients.

**Q4. How do you rate the helpfulness of the group sessions?**

SOURCE: Table 5a, Appendix A.

## Helpfulness of Individual Counseling

Close to 82 percent of DOC clients rated individual counseling as helpful with around 53 percent saying it was very helpful and 29 percent saying it was somewhat helpful. Nearly 58 percent of DOC outpatient clients rated individual counseling as very helpful compared to 36 percent of DOC long term residential clients.

**Q5. How do you rate the helpfulness of the individual counseling?**

SOURCE: Table 5a, Appendix A.

## “...Would you come back to this program?”

DOC treatment programs take place in a highly supervised, institutional setting. Overall, sixty-four percent of DOC clients reported that they would come back to the same program if they were to seek help again with 29 percent saying they would definitely come back and 35 percent saying they would probably come back. Thirty-five percent of DOC outpatient clients said they would definitely come back if they were to seek help again as opposed to nearly nine percent of DOC long term residential clients.

**Q6. If you were to seek help again, would you come back to this program?\***

SOURCE: Table 5a, Appendix A.

\*Please note that compared to community treatment programs, DOC programs take place in an institutional setting and, therefore, this question may elicit more unfavorable responses from DOC clients.

## Need for Legal Services

Overall, 23 percent of DOC clients said they needed legal services.\* Thirty-one percent of DOC long term residential clients expressed a need for legal services compared to 21 percent of DOC outpatient clients.

**Q7. Did you need legal services?**

SOURCE: Table 5b, Appendix A.

## Helpfulness in Identifying and Finding Legal Services

Among those who needed legal services, 45 percent overall said that their program was helpful in assisting them to identify and find legal services with 16 percent saying their program was very helpful and nearly 29 percent saying their program was somewhat helpful. Twenty-two percent of DOC outpatient clients who needed legal services rated their program as very helpful in assisting them to identify and find this service. Only four percent of DOC long term residential clients needing legal services rated their program as very helpful, although this result should be interpreted with caution because of the much smaller number of clients in this modality that needed legal services compared to that in outpatient.

**Q7a. IF YES, how helpful were we in assisting you to identify and find legal services?**

SOURCE: Table 5b, Appendix A.

\*Offenders served by DOC are involved in the criminal justice system and may be expressing a need for legal services beyond the ability of the contracted chemical dependency treatment provider to address. Treatment staff is required to redirect offenders to their DOC counselor for assistance.

## Need for Medical Services

Overall, nearly 35 percent of DOC clients reported that they needed medical services. Around 62 percent of DOC long term residential clients reported they needed medical services compared to about 27 percent of DOC outpatient clients.

**Q8. Did you need medical services?**

SOURCE: Table 5b, Appendix A.

## Helpfulness in Identifying and Finding Medical Services

Fifty-six percent of those needing medical services reported that their program was helpful in assisting them to identify and find medical services with 23 percent saying their program was very helpful and 33 percent saying their program was somewhat helpful.\* Around 28 percent of DOC outpatient clients needing medical services rated their program as very helpful in assisting them to identify and find medical services compared to 17 percent of DOC long term residential clients who needed medical services.

**Q8a. IF YES, how helpful were we in assisting you to identify and find medical services?**

SOURCE: Table 5b, Appendix A.

\*DOC provides medical services to incarcerated offenders at the direction of DOC policy and medical staff. Offenders in the community are not eligible for DOC funded medical services and, hence, are directed to publicly or privately funded resources as available.

## Need for Family Services

Overall, 22 percent of DOC clients reported a need for family services.\* Nearly 42 percent of DOC long term residential clients reported a need for family services compared to almost 16 percent of DOC outpatient clients.

**Q9. Did you need family services?**

SOURCE: Table 5b, Appendix A.

## Helpfulness in Identifying and Finding Family Services

Of those needing family services, 62 percent overall reported that their program was helpful in assisting them to identify and find family services with almost the same proportion of clients, 31 percent, saying their program was very helpful and somewhat helpful. Thirty-five percent of DOC long term residential clients who needed family services rated their program as very helpful in assisting them to identify and find family services compared to 28 percent of DOC outpatient clients who needed family services.

**Q9a. IF YES, how helpful were we in assisting you to identify and find family services?**

SOURCE: Table 5b, Appendix A.

\*Incarcerated offenders are separated from their families by nature of their circumstances. Those in the community have often lost contact with family due to criminal activity.

## Need for Mental Health Services

Overall, 17 percent of DOC clients reported a need for mental health services. DOC long term residential and DOC outpatient programs had an almost similar proportion of clients needing mental health services, around 19 percent and 17 percent respectively.

**Q10. Did you need mental health services?**

SOURCE: Table 5b, Appendix A.

## Helpfulness in Identifying and Finding Mental Health Services

Of those who needed mental health services, 47 percent rated their program as being helpful in assisting them to identify and find mental health services with nearly 23 percent saying their program was very helpful and 24 percent saying their program was somewhat helpful.\* Twenty-seven percent of DOC outpatient clients who needed mental health services rated their program as very helpful in assisting them to identify and find mental health services.

Around 10 percent of DOC long term residential clients rated their program as very helpful, although this result should be interpreted with care because there were only 42 clients in this modality who needed mental health services.

**Q10a. IF YES, how helpful were we in assisting you to identify and find mental health services?**

SOURCE: Table 5b, Appendix A.

\*DOC is limited to providing mental health services to incarcerated offenders only.

## Need for Educational or Vocational Services

Overall, 38 percent of DOC clients reported they needed educational or vocational services. Around 70 percent of DOC long term residential clients expressed a need for educational or vocational services compared to nearly 29 percent of DOC outpatient clients.

**Q11. Did you need educational or vocational services?**

SOURCE: Table 5b, Appendix A.

## Helpfulness in Identifying and Finding Educational or Vocational Services

Among those who needed educational or vocational services, close to 65 percent reported that their program was helpful in assisting them to identify and find these services with around 39 percent saying their program was very helpful and 26 percent saying their program was somewhat helpful.\* Forty-three percent of DOC long term residential clients who needed educational or vocational services reported that their program was very helpful in assisting them to identify and find educational or vocational services compared to 35 percent of DOC outpatient clients who needed these services.

**Q11a. IF YES, how helpful were we in assisting you to identify and find educational or vocational services?**

SOURCE: Table 5b, Appendix A.

\*Offenders are referred to educational and vocational programs during their incarceration as per DOC policy.

## Need for Employment Services

Overall, 40 percent of DOC clients in the survey reported that they needed employment services. Almost 62 percent of DOC long term residential clients said they needed employment services compared to 33 percent of DOC outpatient clients.

Q12. Did you need employment services?

SOURCE: Table 5b, Appendix A.

## Helpfulness in Identifying and Finding Employment Services

Among those who needed employment services, close to 48 percent rated their program as being helpful in assisting them to identify and find employment services with exactly the same proportion of clients, nearly 24 percent, saying their program was very helpful and somewhat helpful. Twenty-eight percent of DOC outpatient clients who needed employment services reported that their program was very helpful in assisting them to identify and find employment services compared to 16 percent of DOC long term residential clients who needed employment services.\*

Q12a. IF YES, how helpful were we in assisting you to identify and find employment services?

SOURCE: Table 5b, Appendix A.

\*Jobs are available to all clients during treatment; however, some offenders, understandably so, are less likely to take advantage of employment options during the intensive early phases of long term residential treatment. Those progressing to subsequent or later phases of treatment are increasingly eligible for work programs and, in some cases, have jobs reserved exclusively for them as an incentive for progress made in treatment.

## **“What do you like about this program?”**

### **Long Term Residential: Selected Responses**

“It’s an honest program that will work in a person’s life if they give it a chance. Everyone has issues with behavior, and this is an opportunity to explore the destructive behavior patterns and correct them to the best of your ability. That’s beautiful and freedom from self-imprisonment.”

“I like the classes. I’ve learned a lot about things I’ve done to myself and others, that I didn’t even realize I was doing. I also like my self-discovery groups. I’ve learned to trust others and share my true feelings without fear of others outside the group hearing about it.”

“That if an individual is sincere about change in his/her lifestyle and attitude, this program provides the environment that enables that individual to separate his/herself from those that would hinder the necessary thought process that is required.”

“I like how they teach us about ourselves besides our addiction. They helped me understand my feelings and how to deal with them. The counselors are there and willing to talk to us when we need it.”

### **Outpatient/Intensive Outpatient: Selected Responses**

“I’m learning a lot about my addiction, like the biological aspects of it. Learning the social aspects of it is an eye-opener.”

“The people are real and they treat you like a human. They work with your problems individually.”

“The way they explain my needs not being met as a child, values, feeling, dysfunctional family.”

“The program was very helpful for me to look at self and how my actions affected others around me. It also helped me to recognize triggers and how to deal with them in a positive manner instead of using.”

“My teacher lets us be honest and share personal experiences that keep us sober along with experiences that caused us to use. Sharing experiences truly helps. I’ve been in treatment 5 times, some volunteer and some court ordered, and I got more from this class than any other treatment.”

“I felt that it was a two-way mirror looking at me. So I could actually see what I’ve done in my life, feel the impact of it and care enough to do something about it.”

## **“Is there anything you would change about this program?”**

### **Long Term Residential: Selected Responses**

“Yes, to not have to do some of the childish things we have to do. To get more recreation time; one hour a day is not enough.”

“More one-on-one counseling. The need for a better accountability system as to where someone can actually process their feelings instead of just owning or disowning the behavior.”

“If it’s a 9 to 12 month program, then let it be a 9 to 12 month program and don’t keep people longer. I would also change the mandatory wellness to a voluntary program or if a person has got a medical condition, not be reprimanded for not keeping up. Let wellness be voluntary.”

“Instead of a 12 month program, it should be half of that. This is so that people can get to work release, find a job and have something to look forward to instead of old habits.”

“More job skills, vocational class, transition class, family, fatherhood classes, classes to help reenter society, being prepared for culture shock, how to sell ourselves to get a job, how to fill out job applications.”

### **Outpatient/Intensive Outpatient: Selected Responses**

“When seated in a circle, I would like to see everything done in clockwise direction which in native tradition creates positive energy, counter clockwise creates negative energy. Also, I would like a positive word to focus on each day, kindness, forgiveness, etc.”

“People would not be put on the spot to speak in front of others about their private lives.”

“More exposure to film or personal experience from outside sources that pertain to the physical and mental realities of continuing drug use, relapse, and long term sobriety.”

“Get some of the counselors to spend more time with the people in the program.”

“Extend it and make it required for more individuals prior to their release.”

“More help about what to do when you get released—housing, job, starting over, how to pay for housing when you don’t have any outside help.”

***Adult Client Satisfaction in Community  
Treatment Programs Compared to  
Department of Corrections (DOC) Treatment  
Programs***

## Was there a difference in client satisfaction between community and Department of Corrections (DOC) treatment programs?

### Satisfaction with Service Received

As far as outpatient programs are concerned, only a small difference in this measure can be observed between community and DOC treatment programs suggesting that, for this modality, community and DOC clients have similar levels of satisfaction with service received. There is an apparent difference among clients in long term residential where 93 percent of community clients reported being satisfied with service received as opposed to 78 percent of DOC clients, a difference of 15 percent.

Percent of Clients Satisfied with Service Received in Community versus DOC Long Term Residential and Outpatient Programs, 2003\*

SOURCE: Tables 1a and 5a, Appendix A.

### Respect from Staff

Regardless of modality, clients in community treatment programs appeared to have a higher proportion of those saying that staff treated them with respect than DOC treatment programs. However, the difference was small, around five percent in long term residential and four percent in outpatient programs.

Percent of Clients Reporting that Staff Treated Them with Respect in Community versus DOC Long Term Residential and Outpatient Programs, 2003\*\*

SOURCE: Tables 1a and 5a, Appendix A.

\*Included clients who reported that they were very or mostly satisfied with service received.

\*\*Included clients who reported that they were treated with respect all or some of the time.

***Three-Year Trend in Adult Client Satisfaction  
in Department of Corrections (DOC)  
Treatment Programs by Modality***

## Satisfaction with Service Received

- The proportion of DOC long term residential clients reporting that they were satisfied with service received fluctuated between 94 percent in 2001 and 61 percent in 2002.
- The proportion of DOC outpatient clients reporting that they were satisfied with service received stayed within the same range between 2001 and 2003, at around 91 percent and 95 percent.

**Percent of DOC Clients Reporting They Were Satisfied with Service Received, by Modality and Year\***

SOURCE: Tables 6a and 6b, Appendix A.

\*Included clients who reported that they were very satisfied or mostly satisfied with service received.

## Respect from Staff

- The proportion of DOC long term residential clients reporting that staff treated them with respect fluctuated between 94 percent in 2001 and 81 percent in 2002.
- The proportion of DOC outpatient clients reporting that staff treated them with respect was 97 percent in 2001 and remained at similar levels in 2002 and 2003, at around 94 percent.

**Percent of DOC Clients Reporting that Staff Treated Them with Respect, by Modality and Year\***

SOURCE: Tables 6a and 6b, Appendix A.

\*Included clients who reported that they were treated with respect all or some of the time.

## **Part 2: Youth Responses**

### ***Youth Responses in Community Treatment Programs by Modality***

Community youth clients in the survey came from 11 intensive inpatient programs and one recovery house. In order to keep the identity of the recovery house confidential, youth responses from intensive inpatient and recovery house were all grouped in a single “Youth Residential” category.

## Satisfaction with Service Received

Overall, slightly over 90 percent of youth clients in community treatment programs reported that they were satisfied with service received with around 37 percent being very satisfied and nearly 54 percent mostly satisfied. Thirty-seven percent of youth clients in outpatient reported that they were very satisfied with service received compared to 29 percent of youth clients in residential programs.

**Q1. How satisfied are you with the service you have received?**

SOURCE: Table 7a, Appendix A.

## Satisfaction with Comfort and Appearance of Facility

Overall, nearly 91 percent of youth clients in community treatment programs said that they were satisfied with the comfort and appearance of their facility with around 39 percent being very satisfied and 52 percent somewhat satisfied. Forty percent of youth clients in outpatient reported that they were very satisfied with the comfort and appearance of their facility compared to around 25 percent of youth clients in residential programs.

**Q2. How satisfied are you with the comfort and appearance of this facility?**

SOURCE: Table 7a, Appendix A.

## Respect from Staff

Overall, 95 percent of youth clients in community treatment programs reported that staff treated them with respect with around 74 percent saying that staff treated them with respect all of the time and 21 percent saying some of the time. Almost 78 percent of youth clients in outpatient said that staff treated them with respect all of the time compared to 39 percent youth clients in residential programs.

**Q3. Would you say our staff treated you with respect?**

SOURCE: Table 7a, Appendix A.

## Feeling Safe

A little over 94 percent of youth clients in community treatment programs reported that they felt safe in their program with around 65 percent feeling very safe and close to 30 percent feeling somewhat safe. Sixty-six percent of youth clients in outpatient reported feeling very safe in their program compared to 51 percent of youth clients in residential programs.

**Q4. How safe do you feel in this program?**

SOURCE: Table 7a, Appendix A.

## Helpfulness of Group Sessions

Overall, 83 percent of youth clients enrolled in community treatment programs rated group sessions as being helpful with 33 percent saying they were very helpful and 50 percent saying they were somewhat helpful. Youth clients in residential and outpatient programs had nearly the same proportion of those saying that group sessions were very helpful and somewhat helpful.

**Q5. How helpful are the group sessions?**

SOURCE: Table 7a, Appendix A.

## Helpfulness of Individual Counseling

Overall, nearly 79 percent of community youth clients rated individual counseling as helpful with 40 percent saying it was very helpful and 38 percent saying it was somewhat helpful. Around 46 percent of youth clients in residential programs reported that individual counseling was very helpful compared to almost 40 percent of youth clients in outpatient programs.

**Q6. How helpful is the individual counseling?**

SOURCE: Table 7a, Appendix A.

## “...Would you come back to this program?”

Overall, almost 80 percent of youth clients in community treatment programs said that they would come back to the same program if they were to seek help again with 38 percent saying they would definitely come back and 41 percent saying they would probably come back. Thirty-nine percent of youth clients in outpatient said that they would definitely come back to the same program if they were to seek help again as opposed to 32 percent of youth clients in residential programs.

Q7. If you were to seek help again, would you come back to this program?

SOURCE: Table 7a, Appendix A.

## **“What do you like about this program?”**

### **Residential Program: Selected Responses**

“I think this program is very helpful. It would be a lot better if it had a weight room. I like working with all young men because I don’t get distracted by women.”

“What I like about the program is that it is very structured. It teaches some life skills as well like cleaning your room, bathroom, and making your bed.”

“That it will help me with my sobriety. And the counselors focus on what you’re struggling with the most and can teach you a lot about ways to stay sober. You get to go to a lot of AA or NA meetings.”

“The counseling and care. Support from peers and certain staff. The skills are very good and help if you’re willing. The chance they give you.”

“That we learn to talk about our feelings and that we meet people that are going in the same shoes as me and that nobody can judge me because they’re all addicts like me.”

“I’m safe from temptations to use and this is a pretty neutral environment, which is good, I like my P.C. and the format for treatment.”

“That all staff and counselors treat me with respect and are there to help me with my problems. We eat good too. Thanks for the food.”

### **Outpatient/Intensive Outpatient Program: Selected Responses**

“The confidentiality and the open-minded, adaptive attitude of my counselor made it easy to communicate with him as well as accept his advice.”

“They get me in touch with my feelings and make me talk about them and I can discuss my problems with the group.”

“I felt comfortable with the staff and I learned about my addiction.”

“I like how the program is easy going and there are patients my age and counselors are friendly and easy to talk to.”

“It helps me with my drug problem and teaches me what it can do to me and my life.”

“The feeling that they really care if you make it in life. The strict standards that they set for the patients”

## **“What do you not like about this program?”**

### **Residential Program: Selected Responses**

“Lack of respect sometimes. Lack of facilities and it is too much like jail. Especially for someone like me who is here on self will. (Not court ordered.)”

“I don’t think they should give the peers who don’t want to be here so many chances.”

“That it makes you feel like you are trapped. Also not being able to smoke cigarettes at least. From what I know about addiction, it is easier to quit one thing at a time.”

“The judge merits; that there is not enough 1-on-1 time between staff and clients; that we can’t talk to boys that much because they think we’re pairing; the food!”

“That you can’t change your P.C. if you can’t talk to them, food sucks, groups aren’t well led, person reading lecture, doesn’t know crap about it. Don’t have my room.”

“The staff sometimes brings their problems to work with them. And some of the rules are ridiculous. And the food sucks sometimes.”

### **Outpatient/Intensive Outpatient Program: Selected Responses**

“When I’m accused of being dirty when there is no proof.”

“The lectures.”

“I don’t like the fact that I have to come here and that the pupils are disrespectful.”

“I don’t like the drama and bad attitudes.”

“Some days are really boring. Sometimes the supervisor doesn’t lead very well and we just sit in silence.”

“Sometimes we don’t cover things we need to go over.”

“I don’t like that there are no females in our group.”

“The classes get old and are not that beneficial, but I still like attending them, hoping to get something out of them.”

“Doesn’t make a difference for my situation except interfere with my time.”

## ***Youth Client Satisfaction in Community Treatment Programs: Differences Between Groups***

## Did youth client satisfaction differ between males and females?

### Satisfaction with Service Received

Regardless of modality, female youth clients appeared to be more satisfied with service received than male youth clients, although the difference was small, two percent in residential and around five percent in outpatient programs.

Percent of Youth Clients Satisfied with Service Received by Modality and Gender\*

SOURCE: Table 7c, Appendix A.

### Respect from Staff

In the residential modality, a higher proportion of female than male youth clients reported that staff treated them with respect, about a six-percent difference. Gender difference in outpatient programs was negligible, just over one percent.

Percent of Youth Clients Reporting that Staff Treated Them with Respect by Modality and Gender\*\*

SOURCE: Table 7c, Appendix A.

\*Included clients who reported that they were very or mostly satisfied with service received.

\*\*Included clients who reported that they were treated with respect all or some of the time.

## Did youth client satisfaction vary among racial/ethnic groups?

### Satisfaction with Service Received

The small number of youth clients in residential programs did not allow for a valid comparison of this measure across racial/ethnic groups (see Table 7d, Appendix A).

However, within outpatient, where there were substantially more cases to permit a comparison across racial/ethnic groups, 82 percent of African American youth clients reported that they were satisfied with service received as opposed to 92 percent of Whites, 87 percent of

Native American youth, 91 percent of Hispanic youth, and 92 percent of youth clients belonging to other race/ethnicity (see chart on the right).

SOURCE: Table 7d, Appendix A.

### Respect from Staff

Similarly, the small number of youth clients in residential treatment did not allow for a fair comparison of this measure across racial/ethnic groups (see Table 7d, Appendix A). However, within outpatient, where the numbers were sufficient to allow such a comparison, the proportion of community youth clients reporting that staff treated them with respect varied from

91 percent among African American youth clients to almost 95 percent among Native American youth, 96 percent among Whites and among youth of other race/ethnicity, and 97 percent among Hispanic youth clients (see chart on the right).

SOURCE: Table 7d, Appendix A.

\*Included clients who reported that they were very or mostly satisfied with service received.

\*\*Included clients who reported that they were treated with respect all or some of the time.

## Did youth client satisfaction vary by length of stay in treatment?

### Satisfaction with Service Received

The number of youth clients in residential programs was not large enough to allow a fair comparison of this measure across varying lengths of stay in treatment (see Table 7e, Appendix A). Grouping outpatient youth clients by length of stay in treatment yielded enough cases to suggest that the proportion of youth clients reporting that they were satisfied with service received was similar across the three outpatient groups, between 94 percent and 95 percent (see chart on the right).

Percent of Youth Clients Satisfied with Service Received by Length of Stay in Outpatient Treatment\*

SOURCE: Table 7e, Appendix A.

### Respect from Staff

Likewise, the small number of residential youth clients did not allow for a fair comparison of this measure across varying lengths of stay in treatment (see Table 7e, Appendix A). But for outpatient programs, where the number of cases was large enough to allow such a comparison, the results indicated that the proportion of youth clients reporting that staff treated them with respect was similar across the three groups, around 96 percent (see chart on the right).

Percent of Youth Clients Reporting that Staff Treated Them with Respect by Length of Stay in Outpatient Treatment\*\*

SOURCE: Table 7e, Appendix A.

\*Included clients who reported that they were very or mostly satisfied with service received.

\*\*Included clients who reported that they were treated with respect all or some of the time.

## Did private pay and publicly funded youth clients differ in client satisfaction?

### Satisfaction with Service Received

A small difference of around five percent can be observed between private pay and publicly funded youth clients in residential programs, with publicly funded youth clients indicating somewhat higher levels of satisfaction. However, this result should be interpreted with caution because of the small number of private pay youth clients in residential programs. No difference can be observed between private pay and publicly funded youth clients in outpatient programs.

SOURCE: Table 7f, Appendix A.

### Respect from Staff

Within residential programs, over 94 percent of private pay youth clients reported that staff treated them with respect compared to nearly 88 percent of publicly funded youth clients. This result should be interpreted with caution because of the small number of private pay youth clients in residential programs. There was only a negligible difference observed between private pay and publicly funded youth clients in outpatient programs.

SOURCE: Table 7f, Appendix A.

\*Included clients who reported that they were very or mostly satisfied with service received.

\*\*Included clients who reported that they were treated with respect all or some of the time.

## ***Client Satisfaction of Youth and Adults in Community Treatment Programs Compared***

## Was there a difference in client satisfaction between youth and adults in community treatment programs?

### Satisfaction with Service Received

Regardless of modality, adult clients appeared to be more satisfied with service received than youth clients, although the difference was less than 10 percent. In residential programs, around 96 percent of adult clients reported that they were satisfied with service received compared to nearly 87 percent of youth clients. For outpatient, almost 97 percent of adult clients reported that they were satisfied with service received compared to nearly 91 percent of youth clients.

**Percent of Youth and Adult Clients Satisfied with Service Received, by Modality, 2003\***

SOURCE: Table 8, Appendix A.

### Respect from Staff

Regardless of modality, a higher proportion of adult clients than youth clients reported that staff treated them with respect, although the difference was small, around five percent in residential and close to three percent in outpatient programs.

**Percent of Youth and Adult Clients Reporting that Staff Treated Them with Respect, by Modality, 2003\*\***

SOURCE: Table 8, Appendix A.

\*Included clients who reported that they were very or mostly satisfied with service received.

\*\*Included clients who reported that they were treated with respect all or some of the time.

## ***Youth Responses in Juvenile Rehabilitation Administration (JRA) Treatment Programs***

The **Juvenile Rehabilitation Administration (JRA)** treatment programs that participated in the survey included two intensive inpatient programs, one recovery house, and one outpatient/intensive outpatient (OP/IOP) program. In order to keep the identity of the recovery house and the OP/IOP program confidential, JRA client responses were not grouped by treatment modalities in contrast to other sections of the report. Youth participating in JRA programs were committed to JRA facilities involuntarily.

## Satisfaction with Service Received

Close to 77 percent of JRA clients reported that they were satisfied with service received with 13 percent being very satisfied and 64 percent mostly satisfied.

**Q1. How satisfied are you with the service you have received?**

## Satisfaction with Comfort and Appearance of Facility

JRA clients participate in treatment provided within an institutional environment. Seventy-five percent of JRA clients said that they were satisfied with the comfort and appearance of their facility with 14 percent being very satisfied and 61 percent mostly satisfied.

**Q2. How satisfied are you with the comfort and appearance of this facility?\***

\*Please note that JRA programs, compared to youth community treatment programs, take place in an institutional setting and, therefore, this question may elicit more unfavorable responses from JRA clients.

## Respect from Staff

Among JRA clients in the survey, 78 percent reported that staff treated them with respect.

Thirty-nine percent said that staff treated them with respect all of the time, while an equal proportion said that staff treated them with respect some of the time.

**Q3. Would you say our staff treated you with respect?**

(n=77)  
SOURCE: Table 7a, Appendix A.

## Feeling Safe

Eighty-two percent of JRA clients reported feeling safe in their program. There was little difference in the proportion of those feeling very safe and those feeling somewhat safe.

**Q4. How safe do you feel in this program?**

(n=77)  
SOURCE: Table 7a, Appendix A.

## Helpfulness of Group Sessions

Nearly 77 percent of JRA clients reported that the group sessions were helpful with 23 percent saying they were very helpful and 53 percent saying they were somewhat helpful.

Q5. How helpful are the group sessions?

(n=77)  
SOURCE: Table 7a, Appendix A.

## Helpfulness of Individual Counseling

Seventy-five percent of JRA clients rated individual counseling as being helpful with 31 percent saying it was very helpful and 44 percent saying it was somewhat helpful.

Q5. How helpful is the individual counseling?

(n=77)  
SOURCE: Table 7a, Appendix A.

## “...Would you come back to this program?”

JRA programs take place in an institutional setting. Fifty-two percent of JRA clients reported that they would come back to the same program if they were to seek help again. Twenty-two percent reported that they would definitely come back, while 30 percent said they would probably come back.

**Q7. If you were to seek help again, would you come back to this program?\***

(n=77)  
SOURCE: Table 7a, Appendix A.

\*Please note that JRA programs, compared to youth community treatment programs, take place in an institutional setting and, therefore, this question may elicit more unfavorable responses from JRA clients. Youth participating in JRA programs were committed to JRA facilities involuntarily.

## **“What do you like about this program?”**

### **Selected Responses**

“I like the groups, staff, and some of the peers. I also like the fact that if you need help with something, the answer is only a question away.”

“What I like is the rap group because it helps me to know my peers and to solve our problems with staff and peers, the other reason is, it is for all, and we all like doing it.”

“I like the small groups because I feel more comfortable talking out loud than with the whole group.”

“That I’m learning ways on how to stay clean and sober. Also I like that I am learning knew (*sic*) things about my use and how it effected (*sic*) others.”

“That it takes points off my CRA, and I won’t have to do treatment when I get out, and it helps me face my problems.”

“I like the staff explain things to help you understand the things better. And I like the skills that they teach you here like how to deal with anger and to treat other people with respect. And I like how this program is helping my life.”

“It could get you to be open more and start to be honest a lot. It is good to do what you want to do, and it could help you.”

“What I like about this program is that the group home gave me a chance to change my life and rehabilitate. The program helps me get the proper treatment I need.”

“Helps me stay clean and feel good about myself.”

“The program helps me by letting out my feelings.”

## **“What do you not like about this program?”**

### **Selected Responses**

“...Staff bring their attitude problem and take it out on us. They set us up for failure. They’re quick to punish us for our mistakes like they don’t make mistakes. Don’t have a bathroom in my room. They are always putting us down...”

“I don’t like the way they decide to put you in the program, or how I’m being victimized constantly and threatened by peers and staff don’t help me. I also don’t like the way they counsel me because I haven’t had one individual session here yet...”

“Going to groups everyday and it’s the same and that gets boring after a little bit, cannot get candy or pop.”

“So much room time. Not enough individual counseling. Need longer phone calls (use of collect phone on phase 2).”

“Rules the way there (*sic*) enforced. Staff only recognizes me for bad things in there (*sic*) eyes, which is bullshit. Staff is not taking treatment serious, calling residents priks (*sic*).

“I don’t like how we are in our rooms practically almost all day long. I also don’t like how you have to complete treatment paper work. I think it should be how your (*sic*) taking treatment and behavior in order to get your phases.”

“Too much stress and drama and a lot of miscommunication.”

“Being locked up.”

“That we do not do all the groups, and we should because then it is like we are having a real AA group.”

***Youth Client Satisfaction in Community  
Treatment Programs Compared to Juvenile  
Rehabilitation Administration (JRA)  
Programs***

## Was there a difference in youth client satisfaction between community and Juvenile Rehabilitation Administration (JRA) treatment programs?

### Satisfaction with Service Received

Community treatment programs had a higher proportion of youth clients reporting that they were satisfied with service received compared to JRA treatment programs, 90 percent versus 77 percent. However, this result should be interpreted with caution since there were only 77 JRA clients completing the survey. It should also be noted that youth participating in JRA programs were committed to JRA facilities involuntarily.

Percent of Youth Clients Satisfied with Service Received, Community Versus JRA Treatment Programs, 2003\*

SOURCE: Table 7a, Appendix A.

### Respect from Staff

Ninety-five percent of youth clients participating in community treatment programs reported that staff treated them with respect compared to 78 percent of clients in JRA treatment programs. Again, this result should be interpreted with caution because of the small number of JRA clients completing the survey. It should also be noted that youth participating in JRA programs were committed to JRA facilities involuntarily.

Percent of Youth Clients Reporting Staff Treated Them with Respect, Community Versus JRA Treatment Programs, 2003\*\*

SOURCE: Table 7a, Appendix A.

\*Included clients who reported that they were very or mostly satisfied with service received.

\*\*Included clients who reported that they were treated with respect all or some of the time.

\*\*\*Collapsed across treatment modalities. Note that youth participating in JRA programs were committed to JRA facilities involuntarily.

## How Providers Used Their Own Results from the 2002 Statewide Client Satisfaction Survey

Treatment providers who participate in DASA's annual Statewide Client Satisfaction Survey receive a confidential copy of their individual agency results. In November 2002, DASA conducted a follow-up survey asking providers that participated in the 2002 Statewide Client Satisfaction Survey how they were using their provider-level results. Below are selected responses from the follow-up survey.

### Service Improvement

"We are looking at the 12 questions asked and the quantitative scores given to increase quality improvement in those areas. For example, Q4 looks at the helpfulness of group sessions. 44.2% responded that these sessions were "very helpful". We now want to scrutinize this treatment activity in order to raise the level of satisfaction in this area. We are revising our overall curriculum and content of sessions with help from our own organizational client satisfaction survey results and from our suggestion box. We hope to score at a higher level and thereby increase the quality of care here."

*Claudia D'Allegri, Behavioral Health Director  
Sea Mar Community Health Center/Main Facility Bellingham*

"Front office procedures were made more welcoming and efficient—staff was retrained on customer service...A new procedure has been developed that all clients sign a Release of Information for a medical provider within the first 2 months of services and a Concurrence with CD-COD Treatment is signed by provider. Treatment plans and other information (i.e. relapse, etc.) can then be provided by the medical provider in a timely manner. We initiated a training partnership with the 24 Hour Alcohol/Drug Helpline. One of our case management interns spends half her work week at that facility and is developing a referral base for multi-faceted referral needs that include everything from Parenting Classes to Child-Parent Play Groups to providing Seattle Child Magazine for our resource shelf, as well as seeking culturally specific information for our population."

*Terri Erickson, Program Manager  
Highline West Seattle Mental Health Center*

“It provided external documentation of a problem the DOC was having with the vendor and their staff at a long-term residential treatment program. This finding was imperative to us as we receive some federal funds for the operation of this program. We are adopting the instrument with some modification to replace our own internal client satisfaction survey. We will also adopt the scoring and reporting system and apply it throughout our system. We also shared this information with UCLA who received a federal grant to conduct a Pacifica Coast Research study for the treatment of addicted offenders.”

*Patricia C. Terry, Chemical Dependency Administrator  
Washington State Department of Corrections*

“We are using the survey as a quality assurance tool.”

*Berniece Kroll, Director of Program  
Lourdes Counseling Center Chemical Dependency Program*

“Service improvement and more satisfaction surveys along the way to satisfy the idiosyncratic needs and preference of patients.”

*Duane Stewart, Director  
Belair Clinic*

“We went over the report as a training tool. Helps staff see from patient’s point of view what our strengths and weaknesses are.”

*Tom C. Davidson, Treatment Director  
Merit Resource Services*

“We give a copy of the report to our Unit Leads and collect feedback from them on possible areas for improving the outcome.”

*Cindy Jones, Operations Manager  
Drug Abuse Prevention Center*

“Overall, it allows for connecting the weak links and substantiates the need for service improvement and any program planning changes needed. Working tool for counselors/staff to improve in areas needed. The report states respect from residential providers is low. It is something to address with staff.”

*Vicki Stark, Acting Executive Director  
Perinatal Treatment Services/Seattle, Tacoma*

“We found that clients were not satisfied with facilities. Basically confirmed our suspicions.”

*John Wise, Executive Director  
West Sound Treatment Center*

## **Program Planning**

“We are using the report to meet clients’ needs and requests in areas of: group topics, one-on-one counseling availability, and monthly reports.”

*Roy L. Sykes, Director*  
*BSM New Life Recovery Center*

“Guide for developing outcomes. Confirmed the issues youth struggle with in our facility, gender-specific, visiting etc. See the need to develop specific recreation programs that interest youth.”

*Claudia D’Allegrì, Behavioral Health Director*  
*Sea Mar Community Health Center/Visions*

“It helps us to individualize our treatment regimen.”

*Duane Stewart, Director*  
*Belair Clinic*

“Helped us clarify how we’re fulfilling our agency’s mission statement and current goals. Was there a common thread around any client dissatisfaction?”

*Joan Dellamas, Administrator*  
*Dellamas and Associates*

“Identifying specific client needs in order to re-enter society as a productive person.”

*Michael Cunningham, Clinical Supervisor*  
*Triumph Treatment Services*

“We are using it as a means to determine how we can better provide services to our clients, especially in the initial engagement into treatment.”

*K. Todd Wagner, Clinical Director*  
*Inland Counseling Network*

“Used as a single uniform instrument to compare client satisfaction, within the fields, among each program within the agency. Used as a measurement tool to determine if programs within the agency have met their client satisfaction goals.”

*Jerry Minaker, Program Manager*  
*Pierce County Alliance*

“Due to our clients being in jail our planning is restricted, but it helps us to know our program is effective and meeting needs.”

*Leo Marty, Co-Occurring/Employment Supervisor*  
*Cascade Mental Health Care*

“Our program used this information looking at ways to improve service delivery and treatment with keeping a client perspective in mind in program planning & program development.”

*Preston Boyd, Behavioral Health Manager  
Colville Confederated Tribes*

## **Marketing**

“I am using this information in my talks with the school system, the mayor, and the community. It is valuable information concerning what we are doing in this community.”

*Larry King, Program Coordinator  
West End Outreach Services*

“...I have also again taken this report to the county commissioners, local judge, and prosecutor so that they are getting feedback from all our clients instead of just the ones who go and complain.”

*K. Todd Wagner, Clinical Director  
Inland Counseling Network*

## **Funding Request**

“(We) are seeking funding resources for more comfortable group room chairs.”

*Terri Erickson, Program Manager  
Highline West Seattle Mental Health Center*

“Reports from this survey will be used to acquire funding for program continuation.”

*Marcia Glendenning, Administrator  
Catholic Community Services*

“Supportive in RFP process.”

*Bill Siesseger, Administrator  
Reflections Recovery Center*

## **Resource Allocation**

“Identification of need for mental health services and success in percentage referred to services. [77% of our patients had primary or secondary mental health diagnosis; 71% found us helpful that these issues were identified (referred while addressing recovery needs)].”

*Charlotte Mantooth, Executive Clinical Director  
Triumph Treatment Services/Riel House*

“Our program is using the survey results to add or improve services in our program and match service delivery with patient need.”

*Tom Cook, Branch Administrator  
Sunray Court, Branch Facility of New Horizon Care Corporation*

“We are making better referrals to other services particularly education, family, and mental health services.”

*John Aylmer, Executive Director*  
*Dependency Health Services*

“To implement better services for current clients and to develop ideas on how to serve other groups in the area such as youth co-occurring and prevention services.”

*Vicente Moran, Clinical Director*  
*Casa de Esperanza*

## **Other Uses**

“Helpful in answering county commissioners’ questions.”

*Rick Jessel, Director*  
*Skamania County Counseling Center*

“This report will be used in reporting quarterly information as well as fulfill Council on Accreditation requirements.”

*Marcia Glendenning, Administrator*  
*Catholic Community Services*

“We will use it as a performance improvement project during JCAHO accreditation visit.”

*Andrew J. Saxon, Director*  
*VA Puget Sound Health Care System Addiction Treatment*

“Great for staff morale. Our agency results will be noted in our next newsletter mailed to attorneys, courts, EAPs, etc.”

*Ingrid Kale, Administrator*  
*The Right Step, Inc.*

“Presentations to other organizations and individuals; presentations to Board of Directors.”

*Juliette Sauvage, Substance Abuse Program Manager*  
*Kent Youth and Family Services*

# How Policy Makers Used the Results of the 2002 Statewide Client Satisfaction Survey

Copies of the statewide report on last year's client satisfaction survey, *Clients Speak Out 2002*, were distributed not only to participating treatment providers but, also, to state and county policy makers and other stakeholders. "Policy makers" are loosely defined, in this report, as individuals who are involved in the policy making/implementing process that guides the delivery of substance abuse treatment programs in counties and the state. DASA asked policy makers/implementers and other key informants how they were using the results of the 2002 statewide client satisfaction survey. Here are some of their answers.

## Responses from Policy Makers/Implementers

"I have used the report to: inform me of how clients view our programs to determine if treatment programs are credible with consumers; to educate legislators, other state agencies, federal agencies, and others regarding how consumers feel about our programs; to see if there are differences among client groups about how they feel about the programs (race/ethnicity in particular but, also, by treatment modality); to identify what other types of problems (legal, mental health, etc.) clients say they are facing, and whether the clients believe the program is helping them with these issues (if not, we know we have some training issues)."

*Kenneth D. Stark, Director*

*Division of Alcohol and Substance Abuse*

*Washington State Department of Social and Health Services*

"We used it within the agency and with the vendor who contracts to deliver services. Firstly, we looked inside at reported strengths and weaknesses and, in the case of the LTR (long term residential) site referenced, we developed an action plan to address some of the concerns raised by the client feedback. In partnership with the vendor, we strategized on how to track progress on the action plan items over the year. As a result we learned that, while the feedback was not specific to clinical services, by using the feedback as the starting place we ultimately led ourselves to a clinical file review process, looking for evidence, or lack thereof, of issues addressed. For example, one of the areas noted was transition services and referral support. On paper we had a process; what we found in the files is some staff were not adhering

to the written policy and procedure as evidenced by a lack of case notes documenting such activity. So, it is one thing to have the best written procedures, it is another to assure everyone is following it as expected. So by the way of client feedback, we took the initiative to look closely at the responses and found our system needed a tune up.”

*Patricia C. Terry, Chemical Dependency Administrator  
Washington State Department of Corrections*

“In Whitman County, the results of the Statewide Client Satisfaction Survey are used in a variety of ways. The information is shared with provider staff and used as one important basis for discussions around service delivery efforts/effectiveness. The data/analysis is also presented to the Administrative Board and the County Board of Commissioners for their input and possible policy direction. I am especially appreciative of the fact that a short, easy-to-use survey format is provided, that the same format is used statewide, and that the analysis of the data is done centrally. This way of administering the satisfaction survey seems to provide excellent information while keeping the administrative burden to a minimum.”

*Mike Berney, County Alcohol and Drug Coordinator  
Whitman County*

“In response to your question, for those agencies who have participated in the survey, I’ve included the results as part of my county on-site contract compliance monitoring process. I’m particularly interested in trends and how the agency incorporates survey outcomes and trends into agency and quality improvement.”

*Dan Finn, County Alcohol and Drug Coordinator  
Spokane County*

“In past years, we have been using a locally developed client satisfaction tool. With DASA implementing a survey tool and with the research staff available to evaluate the results, with our providers’ agreement, we have chosen to utilize this annual survey and have contractually mandated provider involvement in the DASA survey. Providers will provide a copy of their agency’s results to the counties for our review and use in managing our programs. We will expect agencies to include review and use of the survey results in their internal QA/QI processes. We expect this will play a role, in the future, in increasing retention in the treatment completion arena. We have reviewed the current survey results against the statewide results and noted some differences for several of our agencies. We will be discussing this review with providers and there could be specific activity in some areas as a result of the dialogue.”

*Dave Hopper, County Alcohol and Drug Coordinator  
Benton and Franklin County*

"I find the information in the survey to be extremely helpful. I have used it to engage in a discussion with the provider community related to quality improvement and treatment completion and retention rates. Additionally, the rates at which clients report the programs as being helpful in connecting them to ancillary services were used in shaping questions in the county RFP process. Most importantly, I used the information as an opportunity to celebrate the success that our agencies are experiencing in terms of overall client satisfaction."

*Jim Vollendroff, County Alcohol and Drug Coordinator  
King County*

"We incorporated some of the suggestions from clients into our needs assessment recommendations. These recommendations are then passed on to our providers for implementation in their services."

*Penni Newman, County Alcohol and Drug Coordinator  
Pierce County*

"I used the results in two ways: I shared the report at our monthly chemical dependency provider meeting, and we discussed various aspects of it. And, I shared the report with the Thurston/Mason Chemical Dependency Advisory Board."

*Donna M. Bosworth, County Alcohol and Drug Coordinator  
Thurston and Mason County*

"I shared some of the information with our Advisory Board, and I referenced the survey in a grant application we wrote to SAMHSA (Substance Abuse and Mental Health Services Administration)."

*Cammy Hart-Anderson, County Alcohol and Drug Coordinator  
Snohomish County*

"Part of our Strategic Plan for the Clallam County Health and Human Services is to access client satisfaction in the programs we fund, so we used it as one of the measures."

*Florence Bucierka, County Alcohol and Drug Coordinator  
Clallam County*

"Whatcom County Substance Abuse Program (not a policy making body) used the results of the CSS (client satisfaction survey) as feedback to county community service agencies, during required on-site visits. If the agency provides us with the results, we do not require them to do a separate county survey."

*Jackie Mitchell, County Alcohol and Drug Coordinator  
Whatcom County*

“I used this as part of a quality improvement presentation to the local Substance Abuse Advisory Board. This was to inform them about the perceptions of satisfaction with treatment services.”

*Eric Hanson, County Alcohol and Drug Coordinator  
Cowlitz County*

“Parts of it were handed out to our board and key informants in our discussions for planning services.”

*KayDee Steel, County Alcohol and Drug Coordinator  
Stevens County*

### **Responses from Other Key Informants**

“We continue to use it as a marketing tool. Recently, the county commissioners were looking at going through the RFP process to provide substance abuse services. I made sure that they had a copy of the 2002 satisfaction survey, and for some reason, they decided to just award the contract to us. I have also continued to review the results with the judge, prosecuting attorney, and public defender, so that they have some reassurance that our mutual clients are satisfied with the services being provided to them. Finally, our team has also used this as a clinical tool, as we had a client who was making allegations that all of our clients were thoroughly displeased with our treatment approach. I provided him with a copy of the satisfaction survey and replied that the results speak for themselves, and if after he had reviewed this document, I would be pleased to discuss the matter further with him. He did take my challenge and reviewed the results, as well as how Inland Counseling compared to other providers, and when we did meet, he admitted he had made these allegations only because he really didn’t want to stop drinking at that time.”

*K. Todd Wagner, Clinical Director  
Inland Counseling Network, Dayton, Columbia County*

“Community Psychiatric Clinic’s Bridgeway Recovery Program conducts an annual “Client Satisfaction Survey” that is part of our “Outcomes Management” protocol. Last year, I used the results of the Statewide Client Satisfaction Survey to validate our internal survey. I found that having two tools to measure client satisfaction was extremely reassuring. When I compared the results of our survey with the statewide survey, they contained the same outcome information. Having two instruments made it easier for me to change processes that clients noted as needing improvement. I look forward to receiving the results of this year’s survey.”

*Ken Nicholas, Program Manager  
Community Psychiatric Clinic, Seattle, King County*

“I have shared your survey results and presentation with the Management Team as a good example of using customer survey results to improve client service outcomes. We also used it as a very good model of involving providers in a standard/consolidated client survey process and also monitoring the providers’ improvements in client services.”

*Alice Liou, Special Assistant to the Secretary and Internal Quality Consultant  
Washington State Department of Social and Health Services*

“We used it as an example in the Customer Feedback Systems Review Report.”

*Nancy Raiha, Manager, Executive Management Information Section  
Research and Data Analysis Division  
Washington State Department of Social and Health Services*

# Technical Notes

## What instruments were used in the survey?

The instruments used in the survey included English and Spanish versions of the adult and youth client satisfaction questionnaires (see Appendix B). These same instruments were used in the 2001 (English version only) and 2002 (English and Spanish versions) statewide surveys.

## Who administered the survey and when?

The survey was administered by participating Washington State alcohol and drug treatment agencies to adult and youth clients who were receiving treatment during the week of March 24, 2003.

## How were agencies selected to participate in the statewide survey?

Agencies volunteered to participate in the survey. Using data from the DASA management information system, Treatment and Assessment Report Generation Tool (TARGET), a list of 447 certified agencies that, as of December 27, 2002, were known to be operating in Washington State, was generated. On January 17, 2003, invitations were mailed to directors of all the 447 agencies requesting their agency to participate in the statewide survey to be held during the week of March 24, 2003. The invitation included: (a) a cover letter stating the purpose of the survey and the promise that they will receive a confidential report of their agency's survey results, (b) copies of the survey instruments, (c) a copy of the "Guidelines for Administration" (see Appendix B), and (d) a survey confirmation form to be returned to DASA.

## How many agencies participated in the survey?

The table below shows that 359 agencies participated in the statewide survey representing a little over 80 percent of the 447 agencies in the mailing list. The survey captured 86 percent of public and 71 percent of private treatment agencies in Washington State.

**Number and Percent of Public and Private Treatment Agencies Participating in the 2003 Statewide Client Satisfaction Survey**

Participation Status	Public Agencies* (n=273)	Private Agencies (n=174)	TOTAL (n=447)
<b>Participating</b>	235 (86.1%)	124 (71.3%)	359 (80.3%)
<b>Non-participating</b>	38 (13.9%)	50 (28.7%)	88 (19.7%)

\*Treatment agencies were considered public if any of their programs, such as intensive inpatient, recovery house, long term residential, outpatient/intensive outpatient, and methadone, was known, as of December 27, 2002, to receive funding from any of the following sources: state, county, federal, or tribal government.

## How did treatment agencies administer the survey?

The survey was administered by treatment agencies using the "Guidelines for Administration," a one-page document containing helpful information on how providers can administer the survey in their agency (see Appendix B). DASA provided treatment agencies with copies of the survey and pencils for the use of clients.

## How were clients selected to participate in the survey?

During the week of March 24, 2003, participating agencies asked all of their clients who were receiving treatment to complete the client satisfaction survey. According to a survey of alcohol and drug state agencies conducted by DASA in 1998, the most commonly used sampling method among states that have a statewide, standardized system of assessing client satisfaction with treatment is to ask all clients, who are participating in treatment within a designated week of the year, to complete the survey.\* This method results in a cross-section of clients who are in different stages of treatment.

## How many clients completed the client satisfaction survey?

The table below shows that 15,715 clients completed the survey representing 75 percent of the reported 21,011 clients who were receiving treatment in the 359 participating agencies during the week of March 24, 2003. The response rate was highest in recovery house and lowest in methadone programs.

**Number of Clients Completing the Client Satisfaction Survey by Treatment Modality**

Treatment Modality	Number of Clients Receiving Treatment During the Week of March 24, 2003*	Number of Clients Completing the Client Satisfaction Survey During the Week of March 24, 2003	Response Rate
Intensive Inpatient	790	679	86%
Recovery House	187	180	96%
Long Term Residential	593	560	94%
Outpatient/Intensive Outpatient	15662	12868	82%
Methadone	3779	1428	38%
<b>TOTAL</b>	<b>21011</b>	<b>15715</b>	<b>75%</b>

\*These figures were reported by participating treatment agencies.

## Who was responsible for analyzing the survey data?

Completed surveys were returned by participating treatment agencies to DASA and were scanned at the University of Washington Office of Educational Assessment. At DASA, Felix Rodriguez, Ph.D., analyzed the survey data and wrote the statewide report.

---

\*Rodriguez, F.I., Krupski, A., Wrede, A. F., Malmer, D. W., and Stark, K. D. 1998. Assessing Client Satisfaction with Substance Abuse Treatment: What are states doing? Olympia, Washington: Division of Alcohol and Substance Abuse.

\*Included 126 clients from 11 intensive inpatient programs and 17 clients from one recovery house program. In order to keep the identity of the recovery house program confidential, client responses were combined in a single residential category.

\*\*Included 42 clients from two intensive inpatient, 14 from one recovery house, and 21 from one outpatient/intensive outpatient (OP/IOP). In order to keep the identity of the recovery house and the OP/IOP program confidential, JRA client responses were combined in a single "JRA" category.

\*\*\*Please note that JRA programs, compared to youth community treatment programs, take place in an institutional setting and, therefore, this question may elicit more unfavorable responses from JRA clients.

\*The Adult Client Satisfaction Survey asked this question in a slightly different way. See Appendix B.

\*\*Included youth clients in intensive inpatient and recovery house.

\*\*\*Included adult clients in intensive inpatient, recovery house, and long term residential.

## **Appendix B**

(ADULT/ENGLISH)

## CLIENT SATISFACTION SURVEY

FOR DASA USE ONLY									

Please help us improve our program by answering some questions about the services you have received. We are interested in your honest opinion, whether it is positive or negative. **Please answer all of the questions. We shall keep your responses in the strictest confidence.** Thank you very much. We really appreciate your help.

Please fill in the appropriate bubble under each question.

CORRECT MARK

1. In an overall, general sense, how satisfied are you with the service you have received?

- ☐ Very satisfied  
☐ Mostly satisfied  
☐ Dissatisfied  
☐ Very dissatisfied

2. In general, how satisfied are you with the comfort and appearance of this facility?

- ☐ Very satisfied  
☐ Mostly satisfied  
☐ Dissatisfied  
☐ Very dissatisfied

3. Would you say our staff treated you with respect?

- ☐ All of the time  
☐ Some of the time  
☐ Little of the time  
☐ Never

4. How do you rate the helpfulness of the group sessions?

- ☐ Very helpful ☐ Did not receive  
☐ Somewhat helpful  
☐ Not helpful  
☐ Made things worse

5. How do you rate the helpfulness of the individual counseling?

- ☐ Very helpful ☐ Did not receive  
☐ Somewhat helpful  
☐ Not helpful  
☐ Made things worse

6. If you were to seek help again, would you come back to this program?

- ☐ Yes, definitely  
☐ Yes, probably  
☐ No, probably not  
☐ No, definitely not

Please answer all of the questions below. We are interested in knowing how we have been able to assist you in identifying and finding other services that you needed.

7. Did you need legal services? (Example: legal defense, legal advice, DUI assistance)

- ☐ Yes IF YES, how helpful were we in assisting you to identify and find legal services.  
☐ Very helpful ☐ Somewhat helpful ☐ Not very helpful ☐ Not helpful at all  
☐ No

8. Did you need medical services? (Example: medical check-up, medical testing)

- ☐ Yes IF YES, how helpful were we in assisting you to identify and find medical services.  
☐ Very helpful ☐ Somewhat helpful ☐ Not very helpful ☐ Not helpful at all  
☐ No

9. Did you need family services? (Example: parenting class, family recovery services)

- ☐ Yes IF YES, how helpful were we in assisting you to identify and find family services.  
☐ Very helpful ☐ Somewhat helpful ☐ Not very helpful ☐ Not helpful at all  
☐ No

10. Did you need mental health services? (Example: co-occurring disorder treatment, medication management)

- ☐ Yes IF YES, how helpful were we in assisting you to identify and find mental health services.  
☐ Very helpful ☐ Somewhat helpful ☐ Not very helpful ☐ Not helpful at all  
☐ No

11. Did you need educational or vocational services? (Example: basic skills, community college)

- ☐ Yes IF YES, how helpful were we in assisting you to identify and find educational or vocational services.  
☐ Very helpful ☐ Somewhat helpful ☐ Not very helpful ☐ Not helpful at all  
☐ No

12. Did you need employment services? (Example: resumé writing, job placement)

- ☐ Yes IF YES, how helpful were we in assisting you to identify and find employment services.  
☐ Very helpful ☐ Somewhat helpful ☐ Not very helpful ☐ Not helpful at all  
☐ No

## Evaluación del nivel de satisfacción del cliente

Ayúdenos a mejorar nuestro programa respondiendo algunas preguntas sobre los servicios que recibió. Estamos interesados en su honesta opinión, sea positiva o negativa. Por favor, responda todas las preguntas. Sus respuestas serán estrictamente confidenciales. Muchas gracias, valoramos su ayuda.

Rellene el círculo que corresponda, debajo de cada pregunta. MARCA CORRECTA

FOR DASA USE ONLY							

1. En un sentido general, ¿cómo se siente con respecto a los servicios recibidos?

- ☐ Muy satisfecho  
☐ Casi satisfecho  
☐ Insatisfecho  
☐ Muy insatisfecho

2. En general, ¿cómo se siente sobre la comodidad y aspecto del establecimiento?

- ☐ Muy satisfecho  
☐ Casi satisfecho  
☐ Insatisfecho  
☐ Muy insatisfecho

3. ¿Opina usted que fue tratado con respeto por los empleados?

- ☐ Todo el tiempo  
☐ A menudo  
☐ Pocas veces  
☐ Nunca

4. ¿Cómo clasificaría la ayuda recibida de los grupos de terapia?

- ☐ Me ayudaron mucho ☐ No recibí  
☐ Me ayudaron un poco  
☐ No me ayudaron  
☐ Empeoraron mi situación

5. ¿Cómo clasificaría la ayuda recibida en las sesiones de terapia individual?

- ☐ Me ayudaron mucho ☐ No recibí  
☐ Me ayudaron un poco  
☐ No me ayudaron  
☐ Empeoraron mi situación

6. Si necesitara ayuda otra vez, ¿volvería a este programa?

- ☐ Sí, por supuesto  
☐ Sí, probablemente  
☐ No, probablemente no  
☐ No, definitivamente no

Responda las siguientes preguntas en su totalidad. Estamos interesados en saber de qué manera le hemos podido ayudar a identificar y encontrar otros servicios que pudiera necesitar.

7. ¿Necesitó servicios legales? (Ej.: defensa legal, asesoría legal, ayuda DUI.)

- ☐ Sí **Si seleccionó Sí, ¿le ayudamos a identificar y encontrar servicios legales?**  
☐ Mucho ☐ Un poco ☐ No ☐ Nada  
☐ No

8. ¿Necesitó atención médica? (Ej.: un examen general o análisis.)

- ☐ Sí **Si seleccionó Sí, ¿le ayudamos a identificar y encontrar atención médica?**  
☐ Mucho ☐ Un poco ☐ No ☐ Nada  
☐ No

9. ¿Necesitó servicios para la familia? (Ej.: clases para padres, recuperación familiar.)

- ☐ Sí **Si seleccionó Sí, ¿le ayudamos a identificar y encontrar servicios especiales para la familia?**  
☐ Mucho ☐ Un poco ☐ No ☐ Nada  
☐ No

10. ¿Necesitó servicios para la salud mental? (Ej.: desórdenes colaterales, manejo de medicamentos.)

- ☐ Sí **Si seleccionó Sí, ¿le ayudamos a identificar y encontrar servicios para la salud mental?**  
☐ Mucho ☐ Un poco ☐ No ☐ Nada  
☐ No

11. ¿Necesitó servicios para la educación o vocacionales? (Ej.: habilidades básicas, colegio comunitario.)

- ☐ Sí **Si seleccionó Sí, ¿le ayudamos a identificar y encontrar servicios para la educación y vocacionales?**  
☐ Mucho ☐ Un poco ☐ No ☐ Nada  
☐ No

12. ¿Necesitó servicios de empleo? (Ej.: búsqueda de trabajo, para escribir su historia de empleo.)

- ☐ Sí **Si seleccionó Sí, ¿le ayudamos a identificar y encontrar servicios de empleo?**  
☐ Mucho ☐ Un poco ☐ No ☐ Nada  
☐ No

**Great job! Thank you for your comments and for taking the time to help us.**

Survey prepared by the Washington State Division of Alcohol and Substance Abuse (DASA). Questions or comments about this survey should be directed to Felix Rodriguez, Ph.D., by calling (360) 438-8629, by E-mail at [rodrixf@dshs.wa.gov](mailto:rodrixf@dshs.wa.gov), or by writing him at this address: DASA, P.O. Box 45330, Olympia, WA 98504-5330.

(YOUTH/SPANISH)

## Evaluación del nivel de satisfacción de los clientes jóvenes

FOR DASA USE ONLY							

Ayúdanos a mejorar nuestro programa respondiendo algunas preguntas sobre los servicios que recibiste. Estamos interesados en tu honesta opinión, sea positiva o negativa. Por favor, responde todas las preguntas. Tus respuestas serán estrictamente confidenciales. Muchas gracias, valoramos tu ayuda.

Por favor, para las preguntas 1 a 7, rellena el círculo apropiado que mejor describe cómo te sientes.

MARCA CORRECTA  Solo utiliza lápiz N° 2

<p><b>1. ¿Estás satisfecho con los servicios que recibiste?</b></p> <p><input type="radio"/> Muy satisfecho</p> <p><input type="radio"/> Casi satisfecho</p> <p><input type="radio"/> Insatisfecho</p> <p><input type="radio"/> Muy insatisfecho</p>	<p><b>6. ¿Te ayudan las sesiones de terapia individual?</b></p> <p><input type="radio"/> Me ayudan mucho</p> <p><input type="radio"/> Me ayudan un poco</p> <p><input type="radio"/> No me ayudan</p> <p><input type="radio"/> Me hacen peor</p> <p><input type="radio"/> No participo en terapia individual</p>																				
<p><b>2. ¿Cómo te sientes sobre la comodidad y aspecto del establecimiento?</b></p> <p><input type="radio"/> Muy satisfecho</p> <p><input type="radio"/> Casi satisfecho</p> <p><input type="radio"/> Insatisfecho</p> <p><input type="radio"/> Muy insatisfecho</p>	<p><b>7. Si necesitaras ayuda otra vez, ¿volverías a este programa?</b></p> <p><input type="radio"/> Sí, por supuesto</p> <p><input type="radio"/> Sí, probablemente</p> <p><input type="radio"/> No, probablemente no</p> <p><input type="radio"/> No, definitivamente no</p>																				
<p><b>3. ¿Dirías que nuestros empleados te trataron con respeto?</b></p> <p><input type="radio"/> Todo el tiempo</p> <p><input type="radio"/> A menudo</p> <p><input type="radio"/> Pocas veces</p> <p><input type="radio"/> Nunca</p>	<p><b>8. ¿Cuántos años tienes?</b></p> <table border="1"> <tr> <td>0</td> <td>0</td> </tr> <tr> <td>1</td> <td>1</td> </tr> <tr> <td>2</td> <td>2</td> </tr> <tr> <td>3</td> <td>3</td> </tr> <tr> <td>4</td> <td>4</td> </tr> <tr> <td>5</td> <td>5</td> </tr> <tr> <td>6</td> <td>6</td> </tr> <tr> <td>7</td> <td>7</td> </tr> <tr> <td>8</td> <td>8</td> </tr> <tr> <td>9</td> <td>9</td> </tr> </table>	0	0	1	1	2	2	3	3	4	4	5	5	6	6	7	7	8	8	9	9

**¡Excelente! Muchas gracias por tus comentarios y por tomar el tiempo necesario para ayudarnos.**

Este cuestionario fue preparado por Washington State Division of Alcohol and Substance Abuse (DASA). Si tienes preguntas o comentarios acerca de este cuestionario dirígelas a Felix Rodriguez, Ph.D., llamando al teléfono (360) 438-8629, por correo electrónico a [rodrixf@dshs.wa.gov](mailto:rodrixf@dshs.wa.gov), o escribiéndole a esta dirección: DASA, P.O. Box 45330, Olympia, WA 98504-5330.

Washington State Division of Alcohol and Substance Abuse (DASA)

## 2003 Statewide Client Satisfaction Survey

### GUIDELINES FOR ADMINISTRATION

#### **Goal of the Guidelines:**

*These Guidelines provide the basic information regarding the administration of the Client Satisfaction Survey. However, if treatment agencies would like further information or assistance, they should contact:*

Felix Rodriguez, Ph.D.  
Division of Alcohol & Substance Abuse  
P.O. Box 45330  
Olympia, WA 98504-5330  
Phone: (360) 438-8629, or toll-free at  
(877) 301-4557  
E-mail: [rodri@dsas.wa.gov](mailto:rodri@dsas.wa.gov)  
DASA website: [www1.dsas.wa.gov/dasa/](http://www1.dsas.wa.gov/dasa/)

#### **What is the purpose of the Client Satisfaction Survey?**

The Client Satisfaction Survey aims to assess clients' perception of the quality of alcohol/drug treatment services they receive. Information given by clients will be used to improve treatment programs in Washington State.

#### **When will treatment agencies administer the survey?**

Treatment agencies will administer the survey during the week of **March 24-28, 2003.**

#### **What is the goal of the survey?**

To obtain completed surveys from 100% of clients who are participating in treatment during the week of March 24-28, 2003. This will include clients who have started treatment any day during that week.

#### **How will treatment agencies administer the Client Satisfaction Survey? What are some helpful tips for a successful survey?**

- It is important for the agency to use procedures that encourage clients to complete the survey, ensure confidentiality of their responses, and allow them to respond as honestly as possible.
- Agencies who have successfully administered client satisfaction surveys in the past suggest it is helpful to have a survey coordinator who will be responsible for: (a) distributing and collecting the surveys, and (b) returning them to DASA.
- It is important to know the best time and manner to distribute and collect the surveys during the week of March 24-28, 2003. ***We have found in our previous surveys that the best time to give the survey to clients is during group session.***
- It is important: (a) to encourage clients to answer all of the questions in the survey, and (b) to ensure that they complete the survey only once during the week. ***We have found that keeping a list is helpful in tracking those who have and those who have not completed the survey. Experience tells us that 85% to 90% of agency clients who are participating in treatment will complete the survey.***
- It is important to allow clients to seek help from a staff member or from another client if they need assistance in completing the survey (e.g. clarification with questions, definition of some terms, difficulty in reading).

#### **What will treatment agencies do after collecting all the completed surveys?**

**Please fill out the Completion Summary Form. We strongly suggest that the survey coordinator review this form before the week of the survey.** The Completion Summary Form and all the completed surveys should be returned **no later than April 4, 2003**, to:

Felix Rodriguez, Ph.D.  
Division of Alcohol and Substance Abuse  
P.O. Box 45330  
Olympia, WA 98504-5330
